01 Chairman's Message

Executive Leadership Committee — Quarterly Review

The Executive Leadership Committee convenes for its quarterly strategic review, Chicago headquarters.

On behalf of the Board of Directors, I am pleased to present Ardenmoor Industries Corporation's Annual Report for fiscal year 2025 — a year in which our company advanced its transformation from a traditional industrial manufacturer into a diversified technology enterprise spanning automation, renewable energy, precision manufacturing, and digital solutions.

Total revenue for the year reached $16,229 million, an increase of approximately 13 percent over the prior year, while net profit grew to $2,122 million. These results reflect not only favorable end-market demand but also the discipline of our operating teams in translating strategic investment into measurable financial performance.

The Board remains focused on long-term value creation. During the year, we approved an expanded capital allocation framework that balances reinvestment in growth — particularly within our Renewable Energy Systems and Digital & AI Solutions segments — with continued returns to shareholders through dividends and disciplined share repurchases.

A Foundation of Governance and Accountability

This year, the Board strengthened its governance practices, including the formal separation of risk oversight responsibilities into a dedicated Risk Committee and the adoption of enhanced climate-related financial disclosure practices ahead of emerging regulatory requirements across our operating jurisdictions.

I want to thank our employees across 34 countries whose commitment to safety, quality, and innovation continues to be the foundation of Ardenmoor's success. On behalf of the Board, thank you for your continued confidence in our company.

Eleanor R. Vasquez
Chairman & Chief Executive Officer

02 CEO Letter to Shareholders

Fiscal year 2025 was a year of disciplined execution against the strategic roadmap we outlined three years ago. Every business segment delivered organic growth, our Renewable Energy Systems segment in particular accelerated meaningfully, and we made significant progress integrating artificial intelligence into both our products and our internal manufacturing operations.

Engineers at the AI & Digital Solutions Lab develop the next generation of predictive maintenance models.

Segment Highlights

Industrial Automation remained our largest segment, contributing $5,430 million in revenue. Renewable Energy Systems grew fastest among our segments, reaching $4,269 million as demand for grid-scale storage and solar component manufacturing continued to expand across our footprint.

Precision Manufacturing delivered steady performance at $3,675 million, while our newest segment, Digital & AI Solutions, more than doubled over the past three years to $2,855 million, reflecting strong early adoption of our software-defined factory platform among existing industrial customers.

Operational Excellence

We opened two new manufacturing lines this year and advanced our digital twin initiative across five flagship plants, reducing unplanned downtime by double digits at each site. Our commitment to operational excellence remains central to how we compete.

Looking Ahead

As we look to fiscal year 2026, we remain focused on expanding our Asia-Pacific manufacturing footprint, scaling our renewable energy component business, and continuing to invest in the AI capabilities that increasingly differentiate our products in the market. I am confident in our team's ability to deliver on this agenda and to continue generating durable value for our shareholders.

Marcus T. Whitfield
Chief Financial Officer, on behalf of the Executive Leadership Team

03 Company Overview

Ardenmoor Industries Corporation (NYSE: ARDX) is a global industrial technology company headquartered in Chicago, Illinois, United States. Founded in 1978, the company has grown from a single precision tooling workshop into a diversified enterprise operating 21 manufacturing plants across 34 countries, employing approximately 46,782 people worldwide.

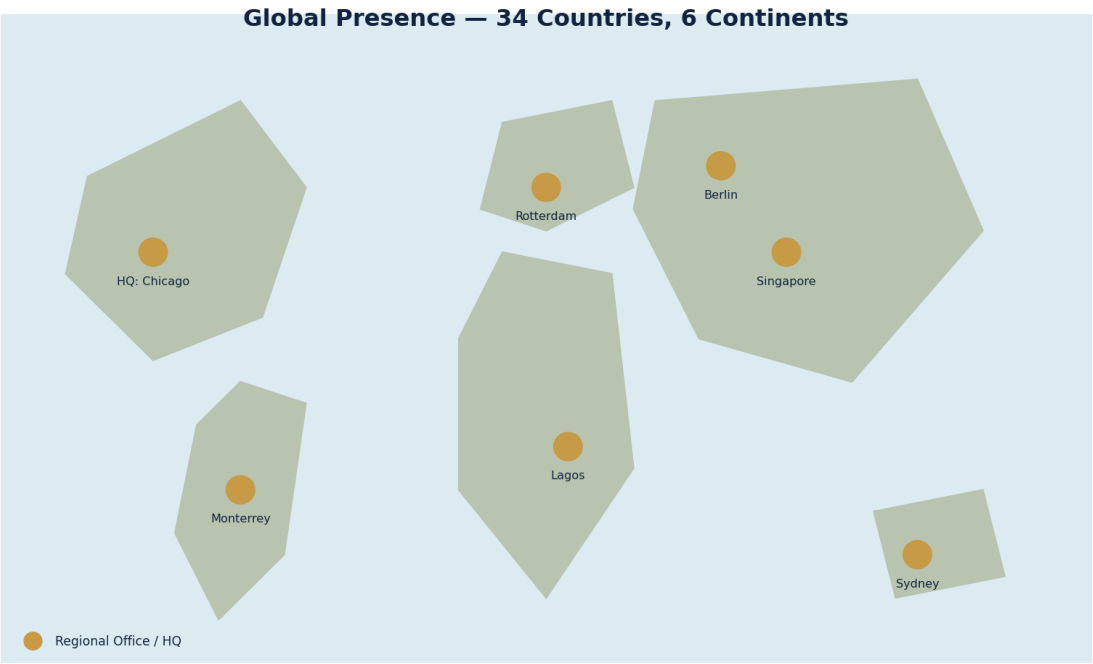

Ardenmoor Global Headquarters, Chicago, Illinois.

What We Do

Ardenmoor designs, manufactures, and services industrial automation systems, renewable energy components, precision-machined parts, and AI-enabled digital manufacturing software. Our customers span automotive, aerospace supply chains, energy utilities, logistics operators, and government infrastructure programs.

Global Footprint

Ardenmoor's global office and manufacturing presence spans six continents.

Regional headquarters in Chicago, Rotterdam, and Singapore coordinate a network of manufacturing plants, distribution centers, and customer support operations, allowing Ardenmoor to serve customers on every populated continent with localized engineering and logistics support.

Founding Era (1978–1993)

Ardenmoor traces its roots to a single precision tooling workshop founded in 1978 on Chicago's near west side, initially supplying machined components to the regional automotive supply chain. The company's founders emphasized rigorous tolerances and reliability, building a reputation among early customers that would underpin decades of subsequent growth.

Expansion Era (1994–2007)

The company expanded into industrial automation, acquiring a small robotics integrator in the late 1980s and opening its first international plant in Germany in 1994. Through the late 1990s and early 2000s, Ardenmoor added manufacturing capacity across Asia and Latin America, establishing the geographic foundation of today's global operating footprint.

Public Company Era (2008–2015)

Ardenmoor completed its public listing on the New York Stock Exchange in 2008, providing capital to accelerate organic growth and fund selective acquisitions. This period was marked by steady expansion of the Industrial Automation and Precision Manufacturing segments and the establishment of the company's first dedicated engineering innovation center.

Diversification Era (2016–2020)

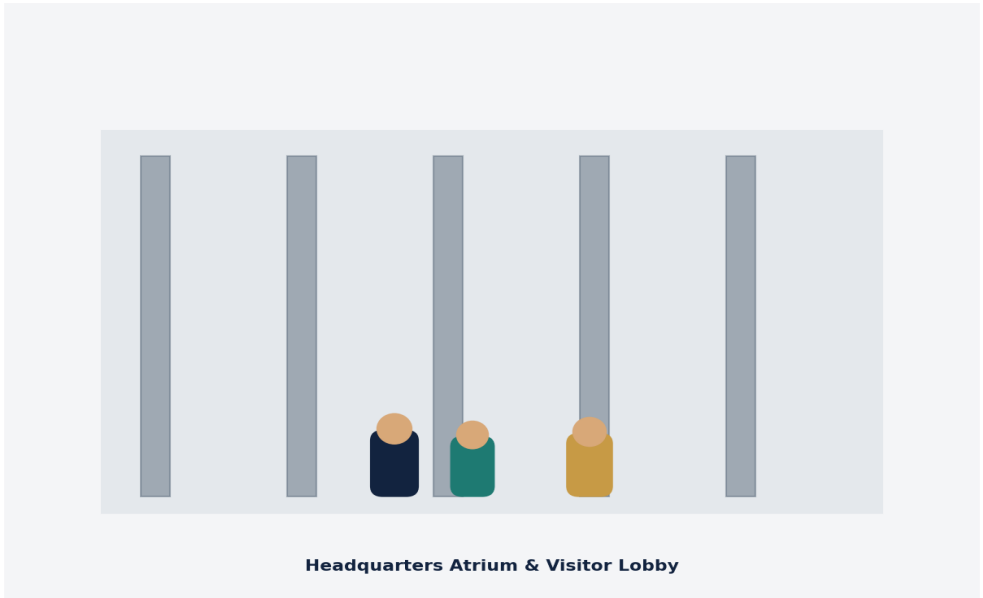

The past decade has been defined by diversification into renewable energy components, beginning with a strategic entry into solar module manufacturing in 2016. This period established the foundation for what would become the company's fastest-growing business segment.

Digital Era (2021–Present)

More recently, Ardenmoor formed its Digital & AI Solutions segment in 2021 to commercialize the predictive maintenance and digital twin software originally developed for internal use across the company's own plants, marking the company's evolution from a pure hardware manufacturer to a diversified industrial technology enterprise.

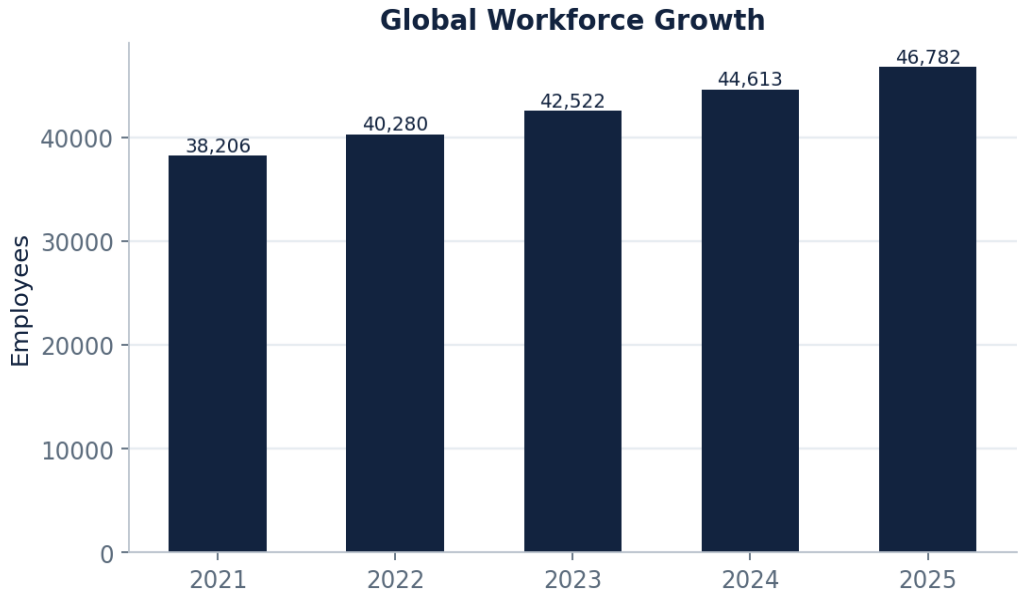

The corporate campus at dusk, viewed from the East Tower.

The headquarters atrium and visitor lobby, Chicago.

Our People

Ardenmoor's global workforce grew to approximately 46,782 employees in FY2025, reflecting both organic hiring to support new manufacturing capacity and continued investment in engineering and digital talent across the company's innovation centers.

Global workforce growth over the five-year reporting period.

Employee Distribution by Region, FY2025

Region	Employees	% of Workforce
North America	17,820	38%
Europe	12,640	27%
Asia-Pacific	11,240	24%
Latin America	3,280	7%
Middle East & Africa	1,870	4%

04 Vision & Mission

Our Vision

To be the world's most trusted partner in building the automated, electrified, and intelligent infrastructure of the future.

Our Mission

We design and manufacture the systems that power modern industry — combining precision engineering, renewable energy technology, and artificial intelligence to help our customers operate more safely, efficiently, and sustainably.

Our Values

Safety First. We never compromise on the safety of our employees, partners, or the communities where we operate.

Engineering Integrity. We hold ourselves to rigorous technical standards in every product we design and build.

Customer Partnership. We measure our success by the long-term success of the customers we serve.

Sustainable Growth. We pursue growth that respects environmental limits and strengthens the communities around us.

Continuous Innovation. We invest relentlessly in new technology, from robotics to renewable energy to artificial intelligence.

Strategic Pillars

Ardenmoor's strategy rests on four pillars that guide capital allocation and operating priorities across the organization: deepening vertical integration across the manufacturing value chain; accelerating growth in renewable energy components; embedding artificial intelligence throughout the product portfolio; and expanding the company's presence in high-growth Asia-Pacific markets.

Each business segment maintains its own strategic plan aligned to these four pillars, reviewed annually by the Executive Leadership Team and presented to the Board as part of the company's long-range planning process.

Business Model Overview

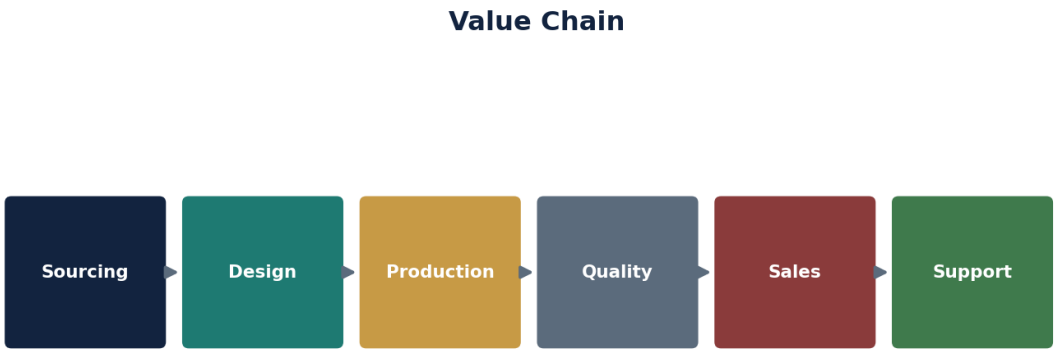

Value created through vertically integrated design, manufacturing and delivery

Ardenmoor's business model connects sourcing, engineering, manufacturing, and distribution into a single integrated value chain.

05 Business Model

Ardenmoor operates a vertically integrated business model spanning materials sourcing, in-house engineering, precision manufacturing, and direct-to-customer deployment and support. This integration allows the company to control quality, protect intellectual property in critical subsystems, and respond quickly to shifting customer requirements.

The Ardenmoor value chain, from sourcing through post-sale support.

Revenue Model

Approximately 70 percent of segment revenue is derived from the sale of core hardware products — automation systems, renewable energy components, and precision-machined parts — while the remaining 30 percent is generated through services, software subscriptions, spare parts, and long-term maintenance contracts. This services layer has grown steadily as a share of total revenue and carries structurally higher gross margins than hardware alone.

How We Create Value

Our engineering teams work directly with customers during the design phase of major installations, embedding Ardenmoor components and control software deeply into customer operations. This close collaboration creates durable, multi-year customer relationships and recurring aftermarket revenue streams that account for a growing share of segment profitability.

Supply Chain Integration

Ardenmoor's supply chain connects a qualified base of tier-1 and tier-2 suppliers to the company's own assembly plants and, ultimately, to regional distribution centers serving end customers. Strategic sourcing relationships, several spanning more than a decade, provide resilience against short-term commodity price volatility and component shortages.

Supply Chain Flow Diagram

Supply chain flow from raw material suppliers through to end customers.

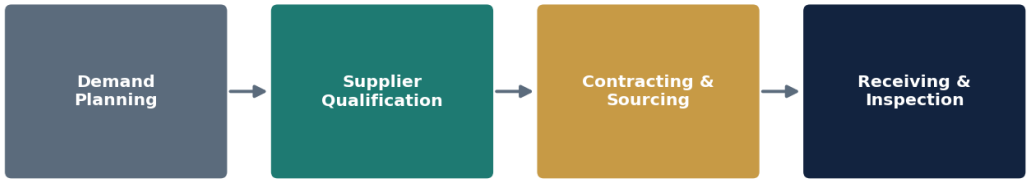

Strategic Supplier Categories

Category	# of Qualified Suppliers	Spend Share
Electronic Components	184	28%
Metals & Alloys	126	22%
Precision Machined Parts	97	19%
Packaging & Logistics	63	11%
Software & Digital Services	48	10%
Other	71	10%

Strategic Procurement

A centralized strategic procurement function manages supplier qualification, contracting, and inbound quality inspection across all Ardenmoor plants, ensuring consistent standards regardless of sourcing geography.

Strategic Procurement Process

The strategic procurement process, from demand planning through receiving and inspection.

06 Global Operations

Ardenmoor's global operations span 34 countries, organized into four regional operating units: North America, Europe, Asia-Pacific, and Latin America, each supported by a regional headquarters responsible for local manufacturing, sales, and regulatory compliance.

Global Operations Network — 34 Countries

Ardenmoor's operations network connects manufacturing, logistics, and customer support functions worldwide.

Global Operations Structure

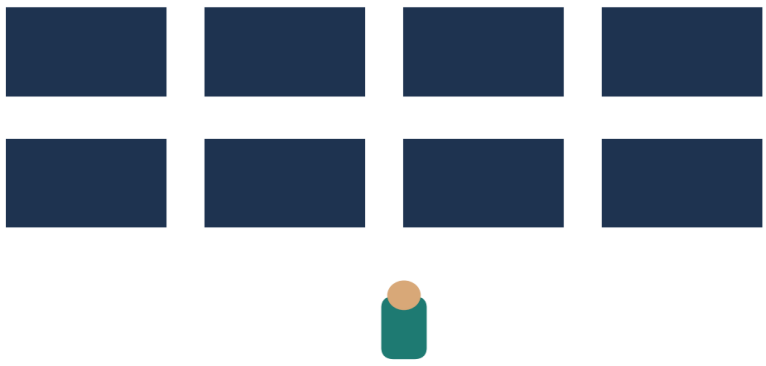

Regional operating structure and headquarters locations.

24/7 Operations Monitoring

A centralized Global Operations Control Room, based at our Chicago headquarters, provides continuous monitoring of production output, logistics performance, and supply chain risk indicators across all regions,

enabling rapid response to disruptions and real-time visibility for regional leadership teams.

24/7 Global Operations Control Room

The Global Operations Control Room provides 24/7 monitoring of manufacturing and logistics performance.

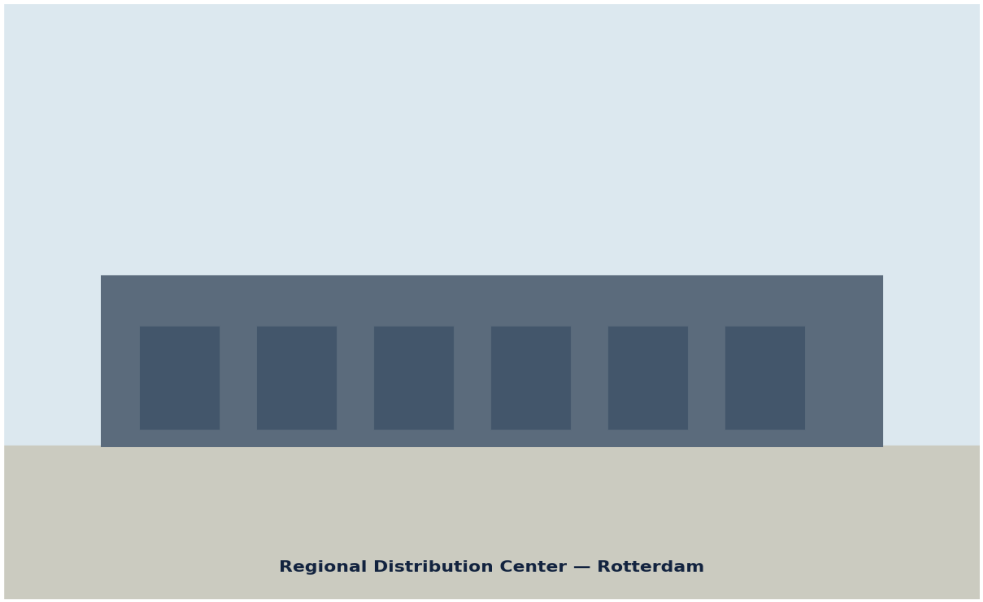

Regional Operating Highlights

North America remains Ardenmoor's largest operating region by both revenue and headcount, anchored by the company's Chicago headquarters and a dense network of plants across the Midwest and southern United States. Europe, coordinated from Rotterdam, combines advanced manufacturing in Germany with logistics hubs serving the broader European Union market.

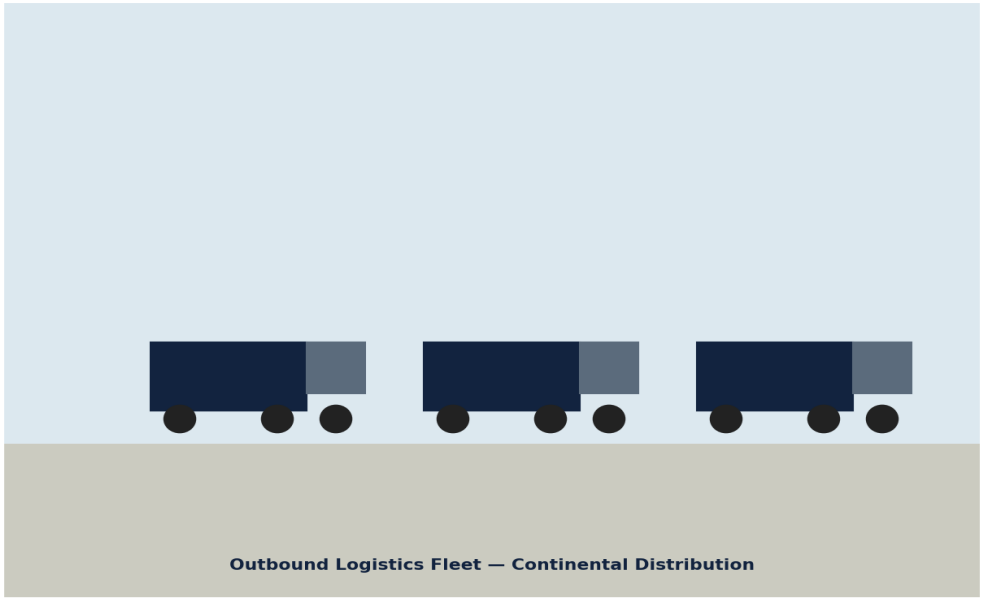

Asia-Pacific operations, headquartered in Singapore, have grown fastest over the past five years, reflecting new plant capacity added to serve regional customers directly rather than exporting from North American or European facilities. Latin America, coordinated from Monterrey, Mexico, supports both regional customers and nearshore manufacturing for the North American market.

Warehousing & Logistics

A network of regional distribution centers and an outbound logistics fleet ensure reliable delivery performance across Ardenmoor's global customer base, supported by long-term relationships with ocean freight, rail, and trucking partners.

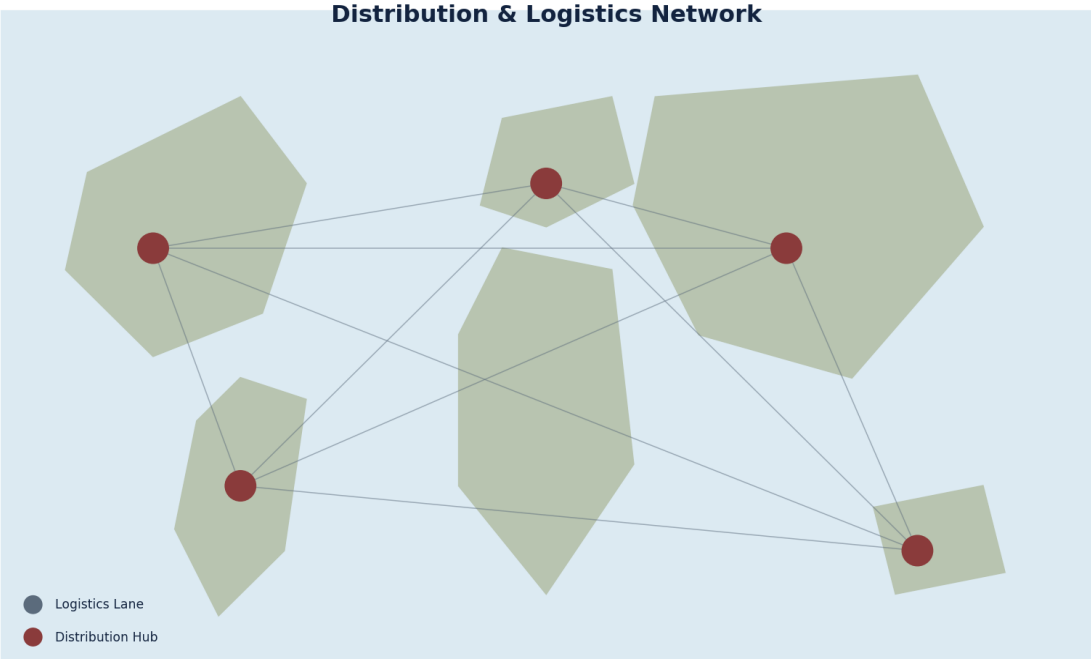

The regional distribution center at Rotterdam supports Ardenmoor's European operations.

Ardenmoor's outbound logistics fleet supports continental distribution.

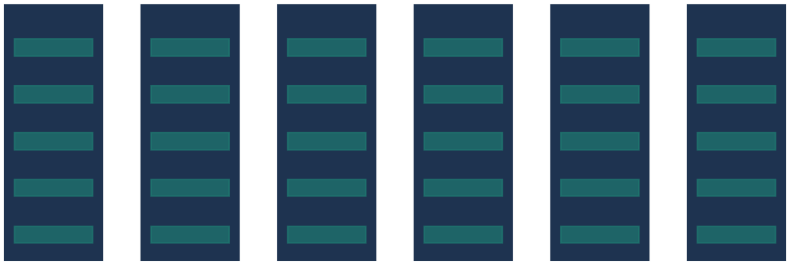

Containerized exports move through the Port of Long Beach en route to Asia-Pacific customers.

Ardenmoor's distribution and logistics network connects regional hubs across every operating continent.

Digital Infrastructure

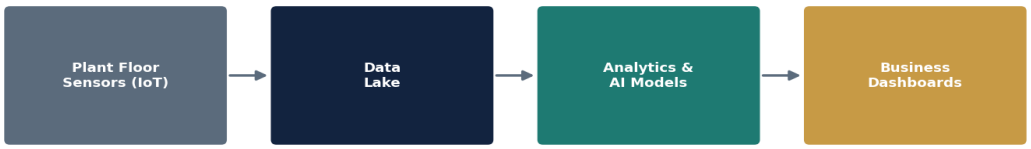

Ardenmoor's global operations are underpinned by an enterprise data center supporting the company's digital manufacturing platform, connecting plant-floor sensors to centralized analytics and AI models used for predictive maintenance and quality control across the network.

Enterprise Data Center — Digital Infrastructure

Ardenmoor's enterprise data center underpins the company's digital manufacturing platform.

Enterprise Data Flow Architecture

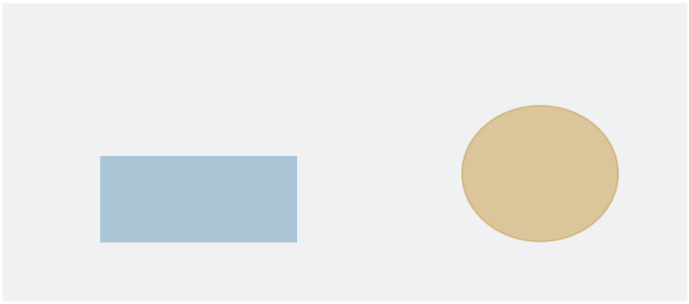

Enterprise data flow architecture, from plant-floor IoT sensors through to business dashboards.

Digital Transformation Pillars

The four pillars of Ardenmoor's digital transformation program.

Quality Assurance & Testing Laboratory

The quality assurance and testing laboratory supports consistent standards across all regions.

07 Manufacturing Facilities

Ardenmoor operates 21 manufacturing plants worldwide, ranging from large-scale automation assembly facilities to specialized precision-machining workshops. Each facility is certified to applicable international quality and environmental management standards.

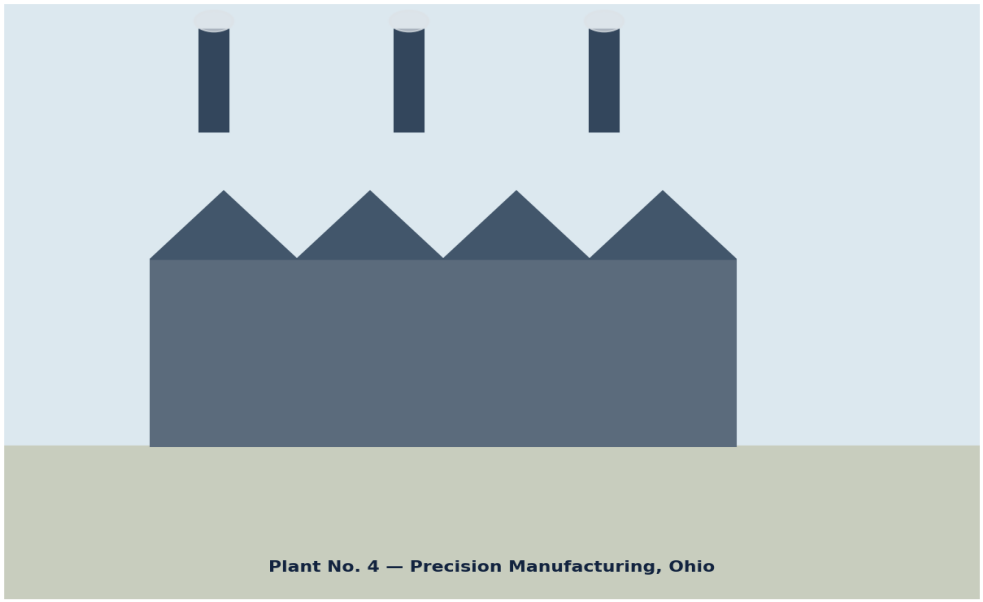

Manufacturing plant locations across Ardenmoor's global network.

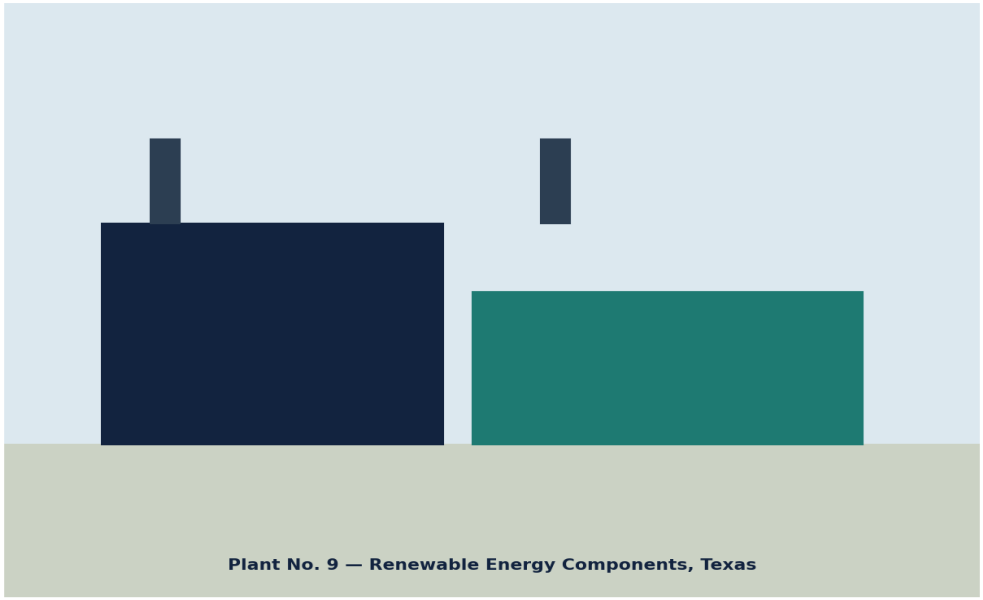

Manufacturing Plant Directory (Selected Facilities)

Plant	Location	Segment	Employees
Plant 1	Chicago, USA	Industrial Automation	2,140
Plant 4	Cleveland, Ohio, USA	Precision Manufacturing	1,860
Plant 9	Austin, Texas, USA	Renewable Energy Systems	1,520
Plant 14	Bavaria, Germany	Industrial Automation	1,340
Plant 17	Rotterdam, Netherlands	Precision Manufacturing	980
Plant 21	Singapore	Digital & AI Solutions	610

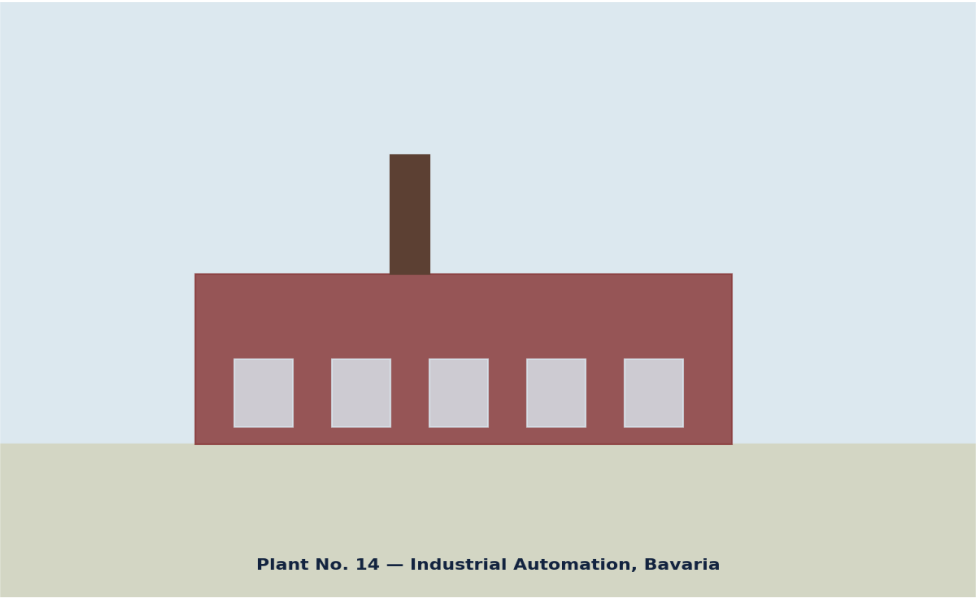

Representative Facilities

Plant No. 4 — Precision Manufacturing facility, Cleveland, Ohio.

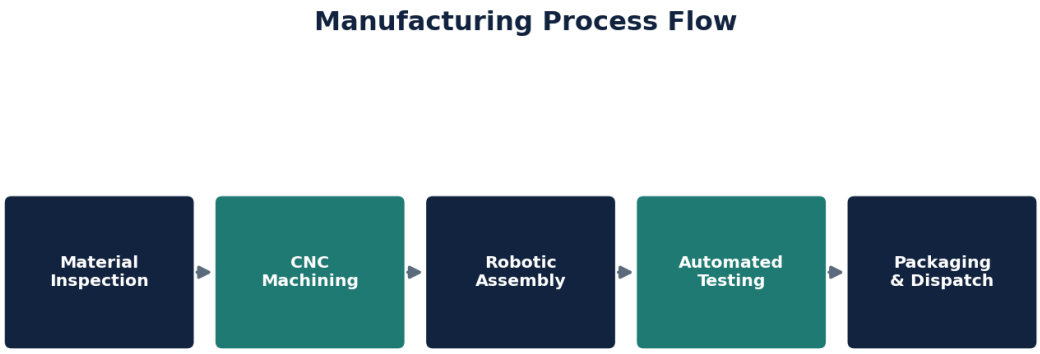

Plant No. 9 — Renewable Energy Components facility, Austin, Texas.

Plant No. 14 — Industrial Automation facility, Bavaria, Germany.

Manufacturing Process

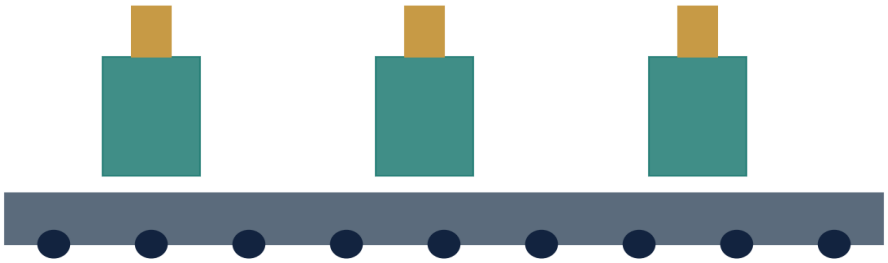

The standardized five-stage manufacturing process applied across Ardenmoor plants.

Manufacturing Workflow

Detailed manufacturing workflow from order intake through shipping.

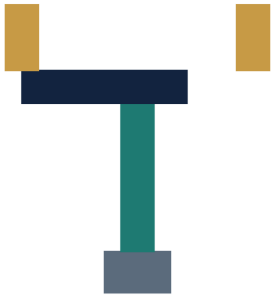

Robotic Assembly Line — Automation Division

Robotic assembly line within the Automation Division.

6-Axis Robotic Arm — Automation Line A

A 6-axis robotic arm in operation on Automation Line A.

Dual-Gripper Robotic Cell — Automation Line B

A dual-gripper robotic cell on Automation Line B.

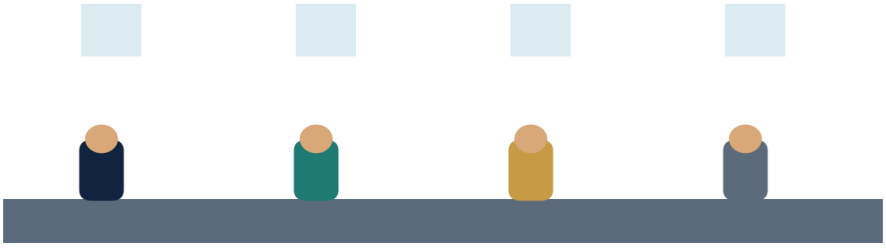

Autonomous Guided Vehicle (AGV) — Plant Floor

An autonomous guided vehicle (AGV) transports materials across the plant floor.

Assembly & Fulfillment

Beyond robotic assembly, several Ardenmoor facilities rely on hybrid human-robot assembly cells, particularly for lower-volume or highly customized orders where flexibility outweighs the benefits of full automation.

Precision Assembly Team — Component Line 3

A precision assembly team works on Component Line 3.

Conveyor & Sub-Assembly Bay — Plant 4

The conveyor and sub-assembly bay at Plant 4.

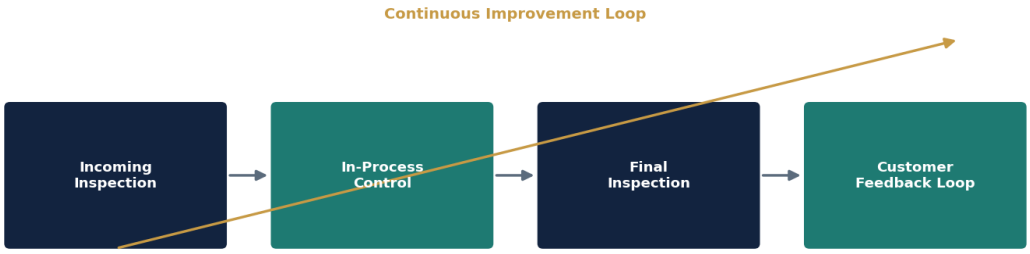

Automated Packaging & Fulfillment Line

An automated packaging and fulfillment line prepares finished goods for shipment.

Quality Management

Every Ardenmoor plant follows a standardized quality management process spanning incoming material inspection, in-process statistical process control, final inspection, and a structured customer feedback loop that feeds continuous improvement initiatives back into the manufacturing process.

Quality Assurance Process

The quality assurance process, including the continuous improvement feedback loop.

Supply Chain Network

Supply chain integration across tiers of suppliers, plants, and distribution.

08 Products & Services

Ardenmoor's product portfolio spans four business segments, each anchored by flagship product families that combine hardware, embedded control software, and ongoing digital services.

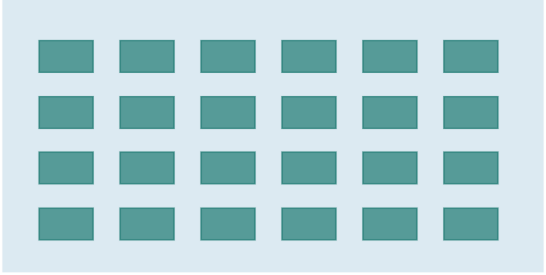

ArdenCore Control Module — Series 7

The ArdenCore Series 7 control module — the core processing unit for Ardenmoor's automation platform.

Precision Sensor Array — Model PX-200

The PX-200 precision sensor array, used across automotive and aerospace manufacturing lines.

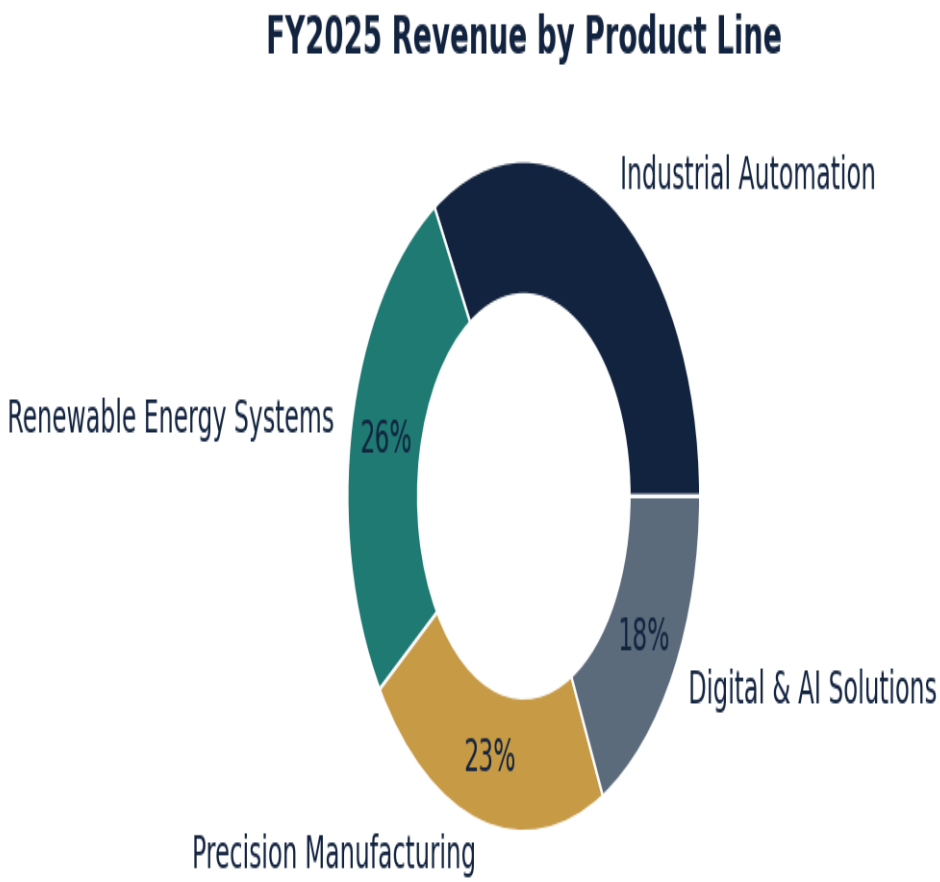

Solar Panel Array Module — RenewLine Series

RenewLine solar module array, part of Ardenmoor's renewable energy component line.

Product Revenue Breakdown

FY2025 Product & Service Revenue Breakdown ($ in millions)

Product / Service Line	FY2025 Revenue
Industrial Automation — Core Products	3,800.8
Industrial Automation — Services & Support	1,628.9
Renewable Energy Systems — Core Products	2,988.5
Renewable Energy Systems — Services & Support	1,280.8
Precision Manufacturing — Core Products	2,572.6
Precision Manufacturing — Services & Support	1,102.6
Digital & AI Solutions — Core Products	1,998.5
Digital & AI Solutions — Services & Support	856.5

FY2025 revenue by product line, reflecting the relative weight of each business segment.

Services & Support

Beyond hardware, Ardenmoor offers multi-year maintenance agreements, predictive maintenance software subscriptions, and on-site engineering support. These services represented approximately 30 percent of segment revenue in FY2025 and typically carry higher gross margins than the underlying hardware products they support.

Customer Journey

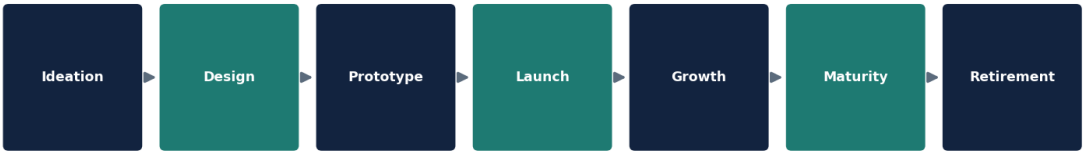

The Ardenmoor customer journey, from initial discovery through ongoing support.

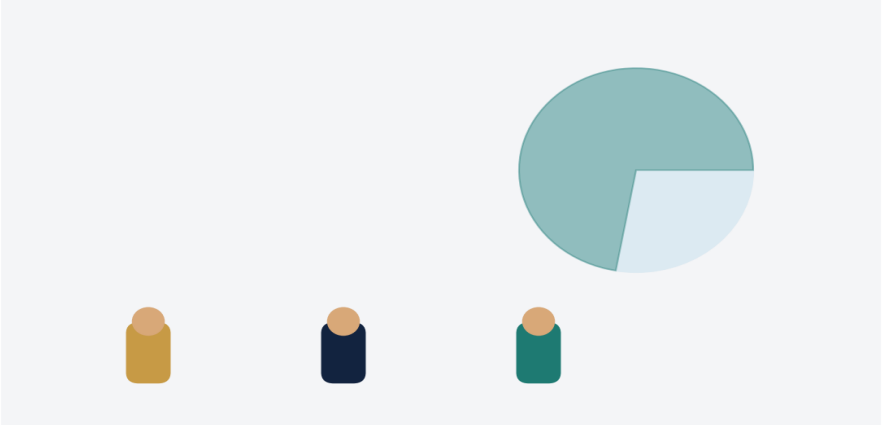

Product Development & Engineering

New products move through a structured lifecycle from concept and design through prototyping, manufacturing release, field support, and eventual end-of-life planning, with dedicated engineering teams responsible for each stage.

Product Lifecycle Diagram

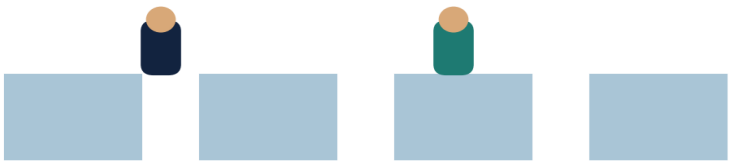

The product lifecycle diagram, from ideation through retirement.

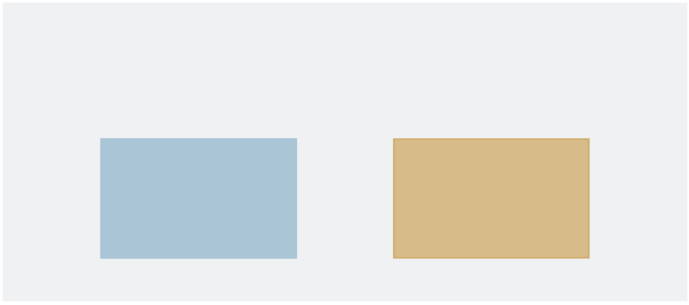

Cross-Functional Engineering Workshop

A cross-functional engineering workshop session.

Materials Science Research Laboratory

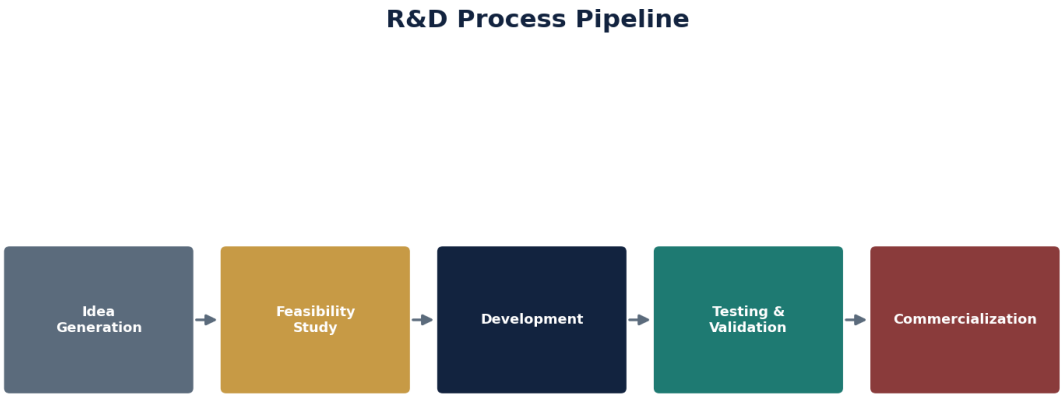

The materials science research laboratory supports new product development.

Rapid Prototyping Studio — Product Design

The rapid prototyping studio accelerates the path from concept to working prototype.

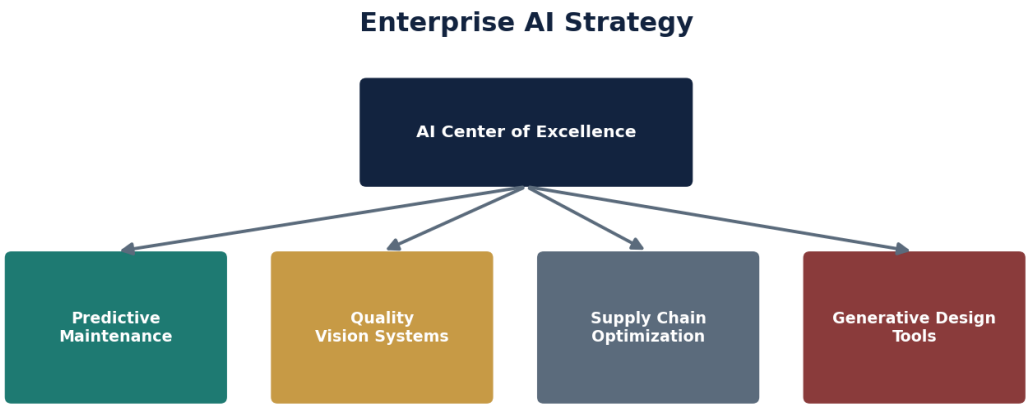

R&D; Process

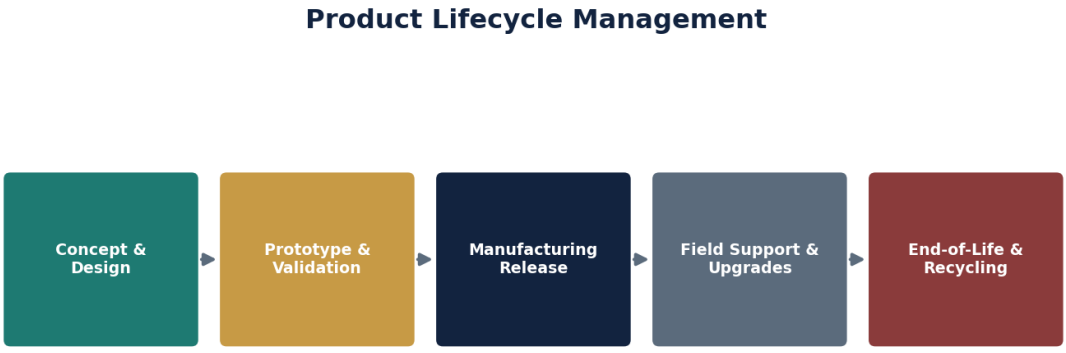

The R&D; process pipeline, from idea generation through commercialization.

Enterprise AI Strategy

Ardenmoor's Digital & AI Solutions segment is supported by a company-wide AI Center of Excellence, which develops predictive maintenance models, computer-vision-based quality inspection systems, supply chain optimization tools, and generative design software used by the company's own engineers.

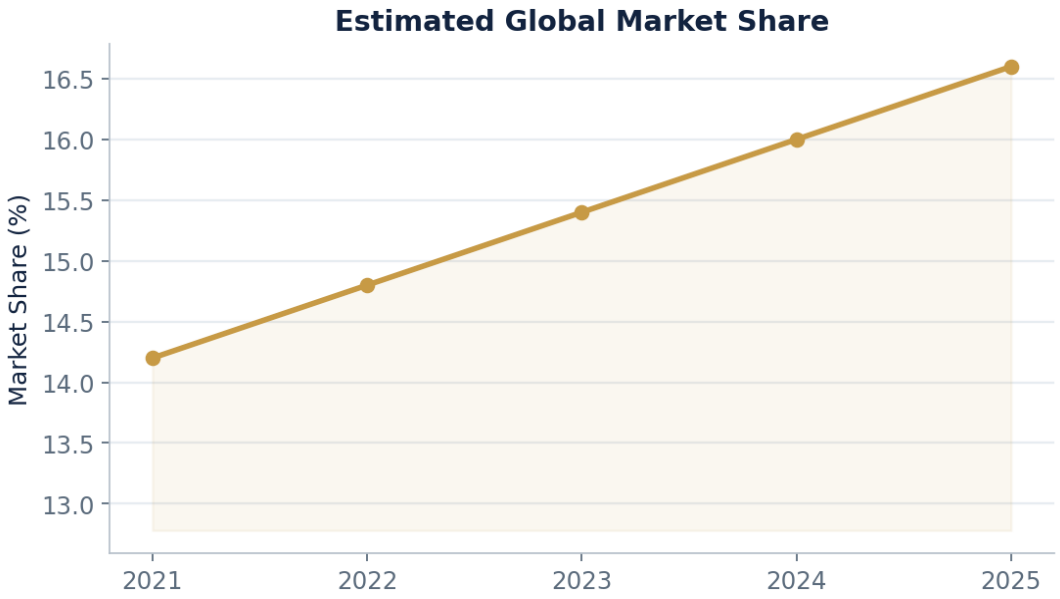

Ardenmoor's enterprise AI strategy, coordinated through a central Center of Excellence.

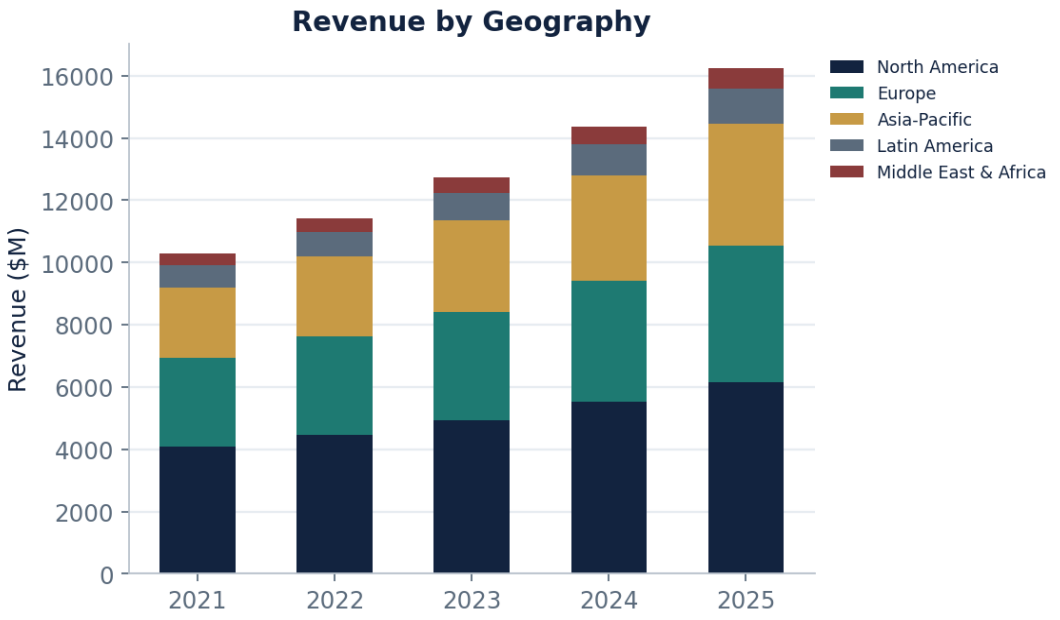

Product lifecycle management across Ardenmoor's hardware and software portfolio.

09 Market Overview

Ardenmoor competes across four large and growing end markets: industrial automation, renewable energy components, precision manufacturing, and industrial software. Each market is shaped by distinct demand drivers, ranging from reshoring of manufacturing capacity in North America and Europe to continued build-out of renewable generation capacity globally.

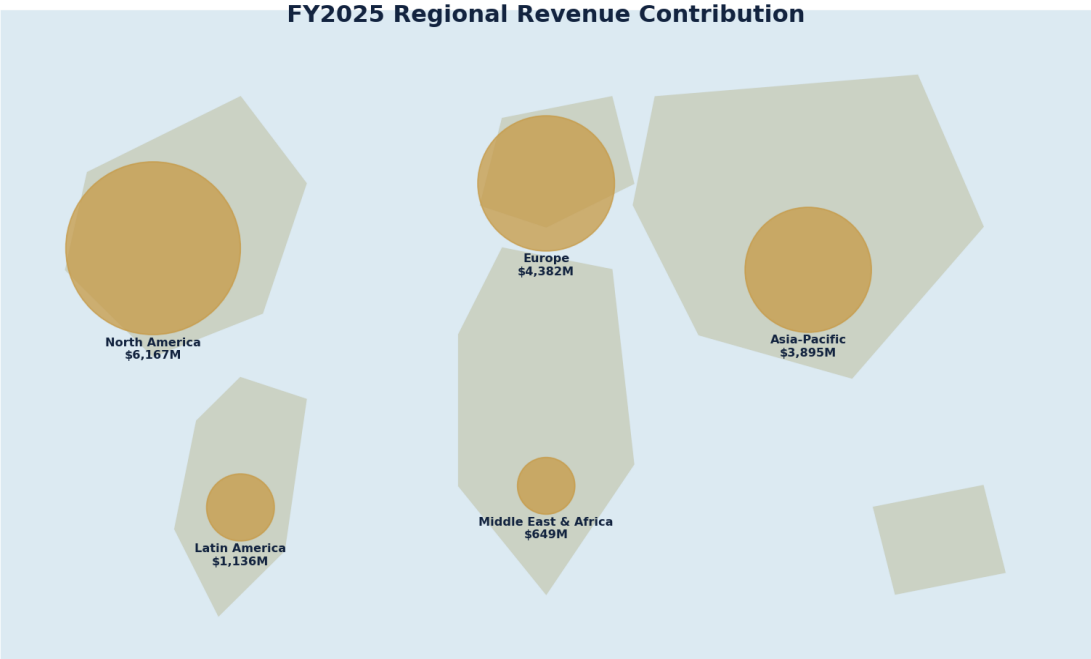

Ardenmoor's estimated global market share has expanded steadily over the past five years.

Revenue by geography reflects Ardenmoor's diversified international customer base.

Revenue by Geography ($ in millions)

Region	2021	2022	2023	2024	2025
North America	4,078.8	4,472.1	4,938.1	5,514.9	6,167.1
Europe	2,863.4	3,148.7	3,487.2	3,906.4	4,381.9
Asia-Pacific	2,266.0	2,566.9	2,927.2	3,375.0	3,895.0
Latin America	700.4	781.5	878.2	998.1	1,136.0
Middle East & Africa	391.4	439.2	496.4	567.3	649.2
Total	10,300.0	11,408.5	12,727.0	14,361.8	16,229.2

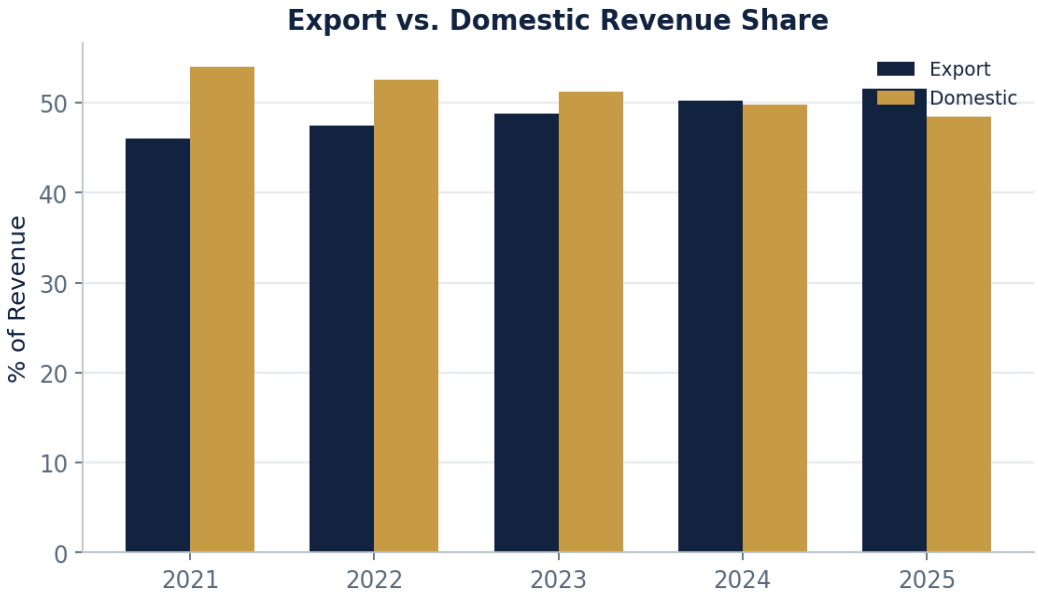

Regional revenue contribution, FY2025, with marker size proportional to revenue.

Demand Drivers

Growth in the Renewable Energy Systems segment continues to be driven by utility-scale storage buildouts and grid modernization programs, particularly in North America and parts of Europe. Industrial Automation demand remains closely tied to broader capital expenditure cycles among manufacturing customers, while Precision Manufacturing benefits from long-term aerospace and defense supply agreements.

Export & Domestic Mix

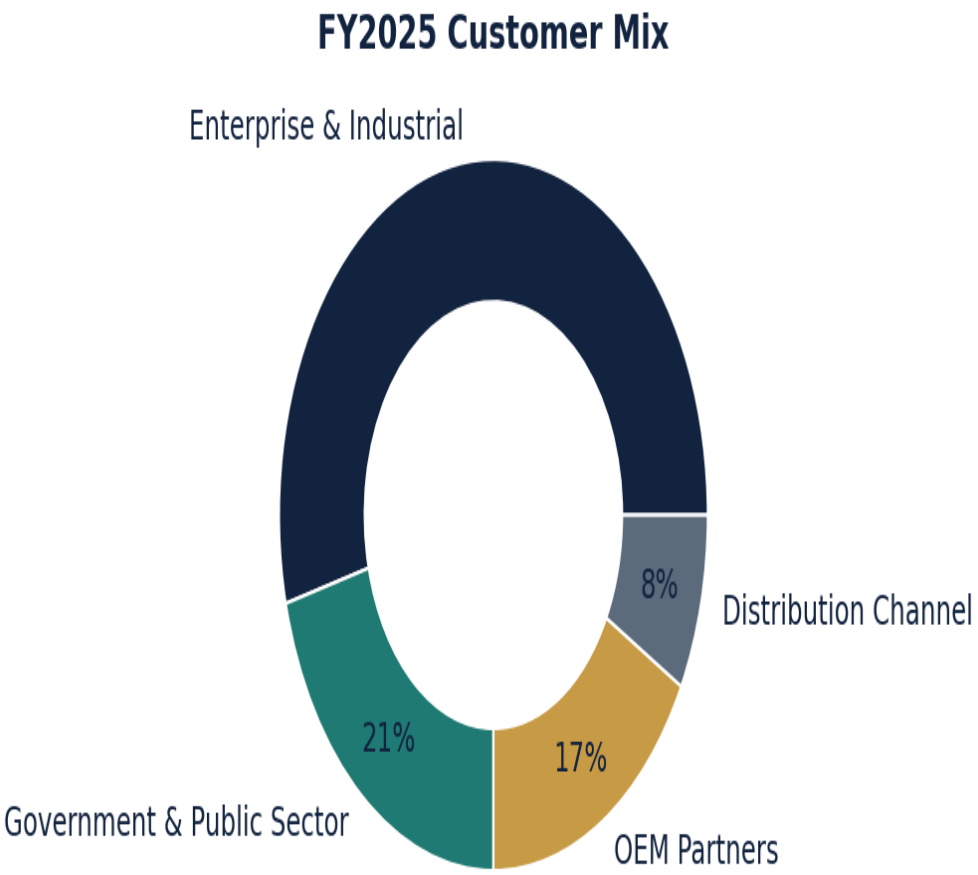

Ardenmoor's export share of revenue has expanded steadily as the company's Asia-Pacific and Latin America manufacturing footprint has grown, reducing reliance on any single domestic market and improving the company's ability to serve customers close to their own operations.

Export versus domestic revenue share over the five-year reporting period.

10 Competitive Landscape

Ardenmoor competes against a mix of large diversified industrial conglomerates and specialized regional manufacturers. The company's principal competitive advantages include its vertically integrated manufacturing base, a broad multi-segment product portfolio that supports cross-selling, and an increasingly differentiated digital and AI software layer embedded in its automation products.

Ardenmoor's customer base is diversified across enterprise, government, and channel partners.

Top Customer Segments by Revenue Contribution, FY2025

Customer Segment	% of Revenue
Enterprise & Industrial Accounts	54%
Government & Public Sector	21%
OEM Partners	17%
Distribution Channel Partners	8%

Competitive Positioning

Management believes Ardenmoor's scale in precision manufacturing, combined with its early investment in AI-enabled quality control and predictive maintenance, provides a durable advantage relative to smaller regional competitors who lack comparable digital capabilities, as well as larger conglomerates with less specialized manufacturing focus.

Strengths

Vertically integrated manufacturing, a diversified four-segment portfolio, and an increasingly differentiated digital and AI software layer embedded across Ardenmoor's automation products.

Areas of Focus

Continued investment is required to scale Asia-Pacific manufacturing capacity to match the growth of regional demand, and to further develop the company's still-nascent Digital & AI Solutions segment relative to specialized software competitors.

Opportunities

Accelerating renewable energy infrastructure investment globally, continued reshoring of advanced manufacturing to North America and Europe, and rising customer demand for AI-enabled predictive maintenance across industrial equipment fleets.

Competitive Threats

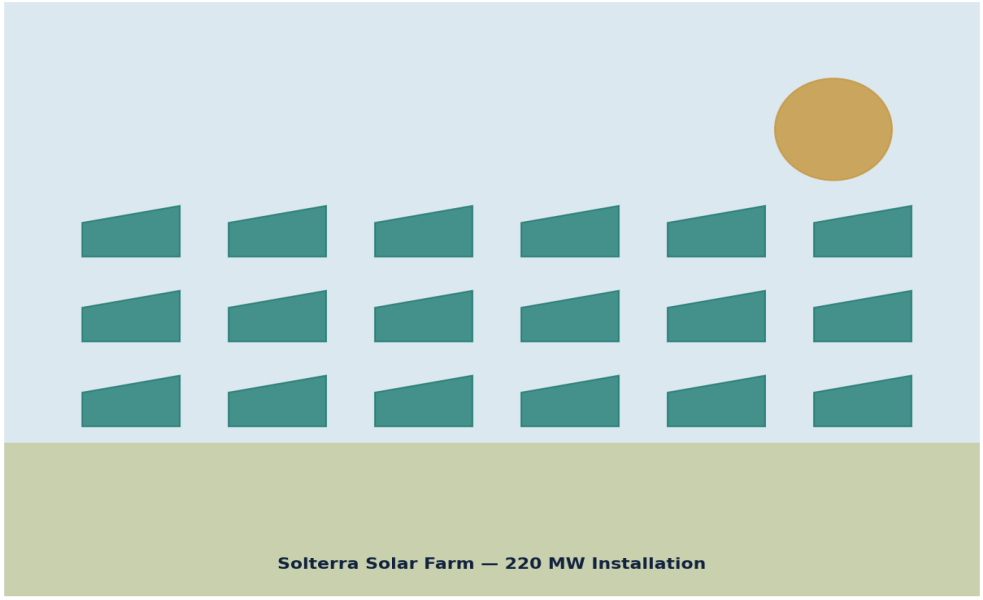

Potential margin pressure from larger, better-capitalized conglomerates entering renewable energy components, and the risk of new entrants offering lower-cost automation hardware from emerging manufacturing hubs.

11 Sustainability (ESG)

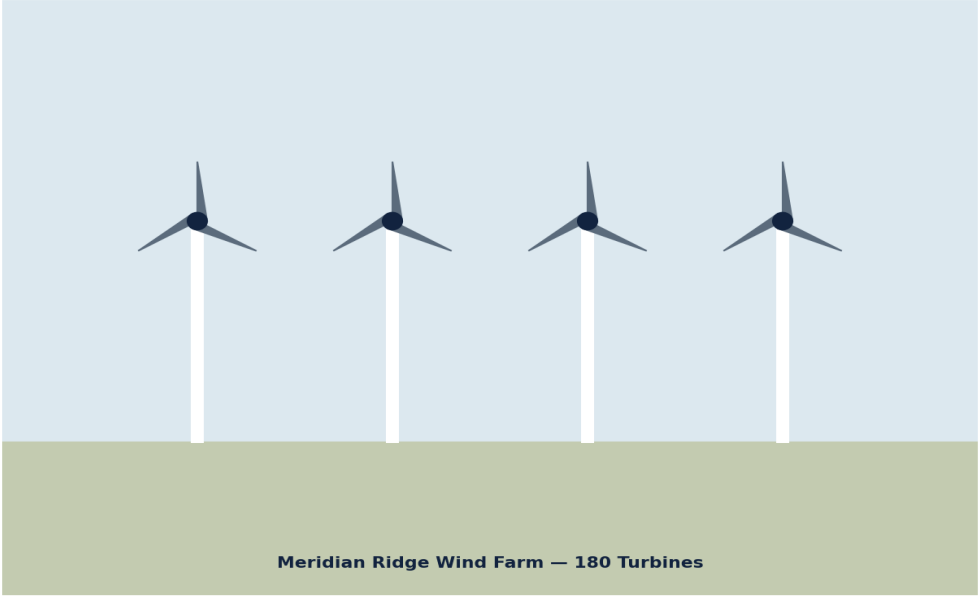

Ardenmoor's sustainability strategy is organized around three pillars: environmental stewardship, social responsibility, and corporate governance. The company has committed to achieving carbon neutrality across its own operations (Scope 1 and 2 emissions) by 2040.

Ardenmoor's ESG strategy framework spans environmental, social, and governance pillars.

The Solterra Solar Farm, a 220 MW installation supporting Ardenmoor's own renewable energy transition.

The Meridian Ridge Wind Farm supplies renewable power to two Ardenmoor manufacturing plants.

Environmental Performance

ESG Performance Metrics

Metric	2021	2022	2023	2024	2025
Carbon Emissions (kt CO2e)	412	398	371	339	298
Renewable Energy Use (%)	22%	28%	35%	44%	53%
Water Recycled (%)	31%	36%	41%	47%	54%
Waste Diverted from Landfill (%)	58%	63%	68%	74%	79%
Workforce Female Representation (%)	29%	31%	33%	35%	37%

Carbon Emissions by Scope (kt CO2e), FY2025

Scope	FY2025 Emissions	YoY Change
Scope 1 (Direct)	94	-8.2%
Scope 2 (Energy Indirect)	112	-11.4%
Scope 3 (Value Chain)	92	-6.1%

Water Usage & Recycling by Region, FY2025

Region	Withdrawal (ML)	Recycled (%)
North America	1,240	56%
Europe	890	61%

Region	Withdrawal (ML)	Recycled (%)
Asia-Pacific	760	49%
Latin America	310	44%

Ardenmoor's community reforestation initiative planted more than 40,000 trees in FY2025.

Social Performance

Workplace safety remains a top priority. The company's total recordable incident rate declined for the fifth consecutive year, supported by expanded safety training programs across all manufacturing sites.

Workplace Safety Metrics

Metric	2021	2022	2023	2024	2025
Total Recordable Incident Rate	1.82	1.61	1.44	1.29	1.11
Lost Time Injury Frequency	0.94	0.81	0.72	0.63	0.55
Safety Training Hours (000s)	412	468	521	587	642

Workplace Safety Training Program

Workplace safety training conducted across Ardenmoor's manufacturing sites.

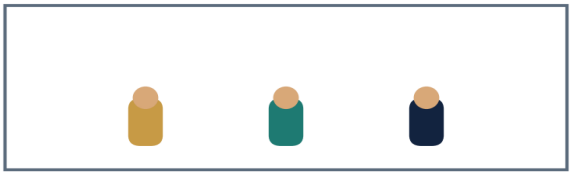

Our People — Global Workforce Diversity

Ardenmoor's global workforce reflects the diversity of the communities in which it operates.

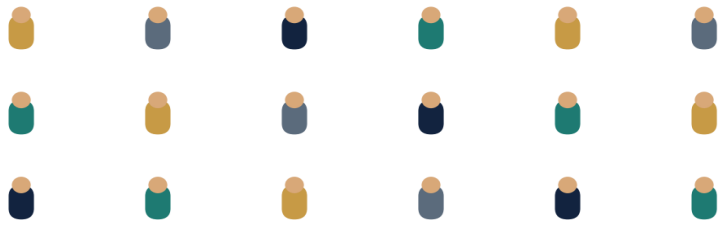

STEM Education Outreach — Community Partnership

The Ardenmoor Cares Foundation's STEM education outreach program reached over 12,000 students in FY2025.

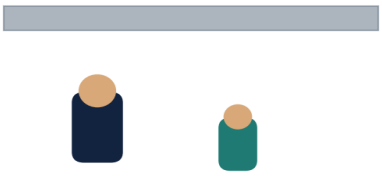

Volunteer Day — Ardenmoor Cares Foundation

Employees participate in an Ardenmoor Cares Foundation community volunteer day.

Global Employee Town Hall — FY2025

Employees from across the global workforce participate in the FY2025 Global Employee Town Hall.

Technical Apprenticeship Program — New Graduates

The technical apprenticeship program welcomed its largest cohort of new graduates in FY2025.

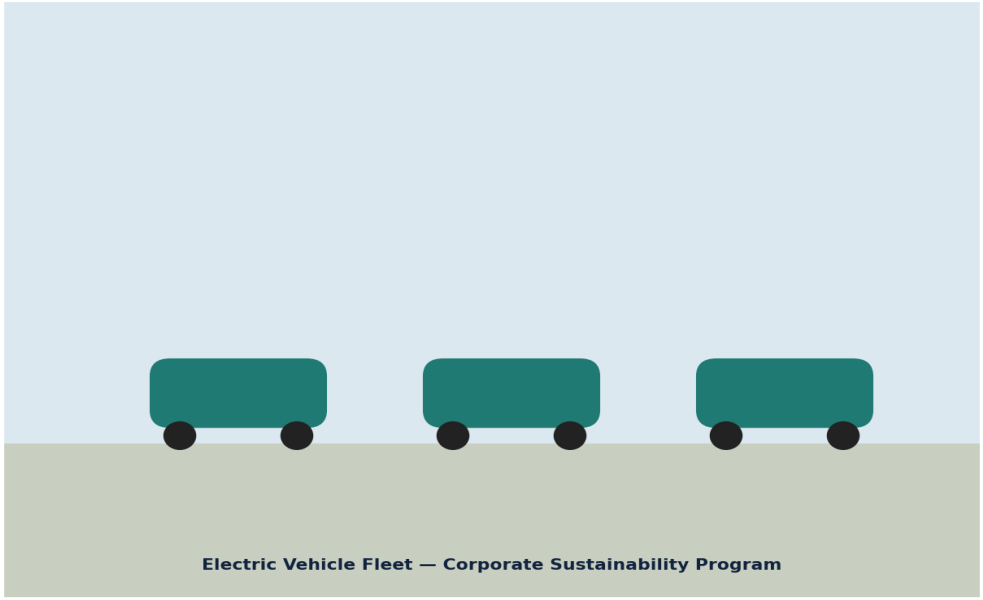

Community Health & Wellness Initiative

The community health and wellness initiative extends benefits beyond the immediate workforce.

Reducing Our Operational Footprint

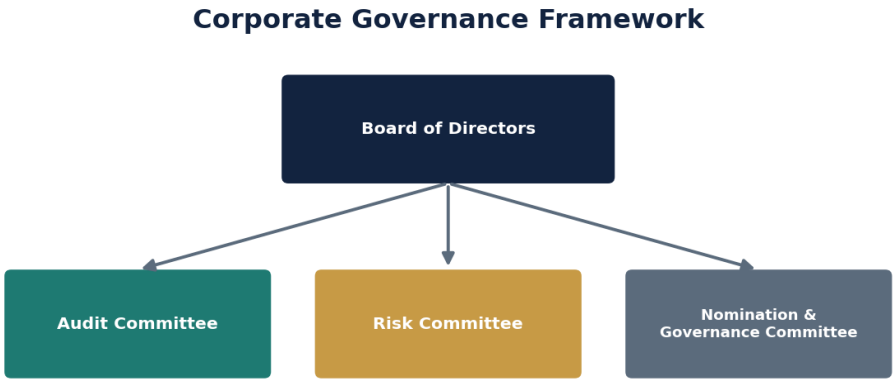

Beyond renewable generation projects, Ardenmoor has begun transitioning its light-duty corporate and site vehicle fleet to electric vehicles as part of its broader sustainability program, with roughly a third of the eligible fleet converted by the end of FY2025.

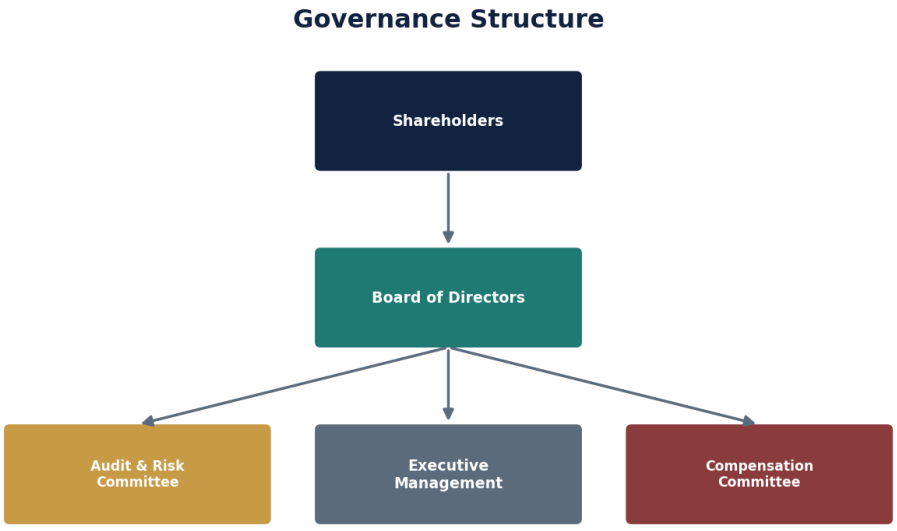

Ardenmoor's growing electric vehicle fleet supports the company's sustainability program.

12 Corporate Governance

Ardenmoor is governed by a Board of Directors comprising seven members, six of whom are independent. The Board operates through three standing committees: Audit & Risk, Compensation, and Nomination & Governance, each chaired by an independent director.

Ardenmoor's corporate governance framework, showing Board committee structure.

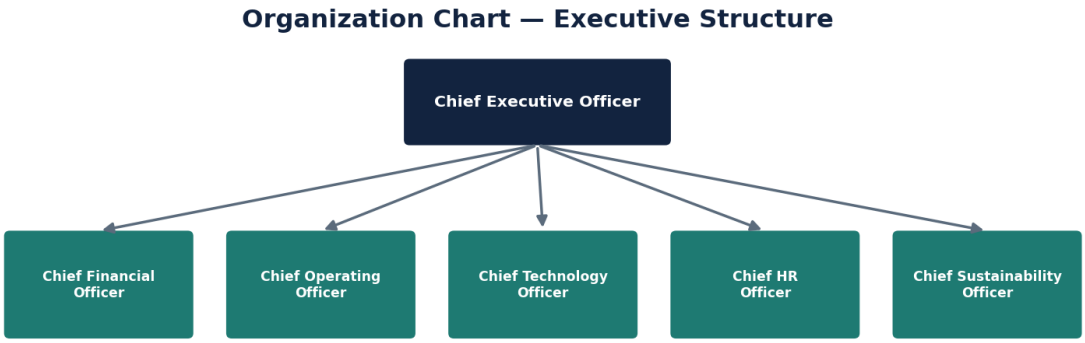

Detailed governance structure from shareholders through executive management.

Board of Directors

Board of Directors

Name	Role	Independent
Eleanor R. Vasquez	Chairman & CEO	No
Dr. Harold F. Yamada	Lead Independent Director	Yes
Susan K. Delacroix	Director, Audit Committee Chair	Yes
Andre P. Lindqvist	Director, Risk Committee Chair	Yes
Dr. Fatima Z. Rahman	Director, Technology & Innovation	Yes
Walter B. Kincaid	Director, Compensation Committee Chair	Yes
Ingrid M. Solberg	Director	Yes

Executive organizational structure reporting to the Chief Executive Officer.

Executive Leadership Team

Executive Leadership Team

Name	Title	Tenure
Eleanor R. Vasquez	Chairman & Chief Executive Officer	9 years
Marcus T. Whitfield	Chief Financial Officer	6 years
Dr. Priya N. Anand	Chief Technology Officer	5 years
Jonas B. Hallström	Chief Operating Officer	7 years

Name	Title	Tenure
Camille D. Okafor	Chief Human Resources Officer	4 years
Richard A. Nakamura	Chief Sustainability Officer	3 years

Eleanor R. Vasquez has served as Chairman and Chief Executive Officer for nine years, having previously led the company's Industrial Automation segment. Marcus T. Whitfield, Chief Financial Officer, joined from a global industrial peer and has overseen the company's capital allocation framework since his appointment. Dr. Priya N. Anand, Chief Technology Officer, previously led advanced robotics research at a national engineering laboratory before joining Ardenmoor to found the company's Digital & AI Solutions segment.

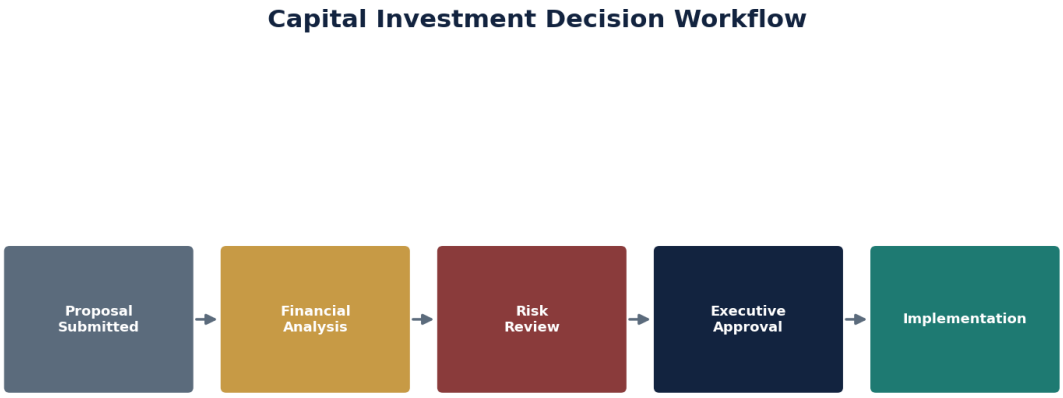

Board of Directors — Strategy Session

The Board of Directors convenes for its annual strategy session.

Capital Investment Governance

Major capital investment decisions follow a structured governance process, requiring financial analysis, risk review, and executive approval prior to implementation, ensuring alignment between individual project decisions and the company's overall strategic priorities.

The capital investment decision workflow, from proposal through implementation.

Executive Compensation

Executive compensation is designed to align leadership incentives with long-term shareholder value creation, combining base salary, an annual cash incentive tied to financial and operational targets, and long-term equity awards that vest over multiple years. The table below summarizes illustrative FY2025 compensation for the company's most senior executives.

Executive Compensation Summary, FY2025 (Illustrative, $ in thousands)

Name	Base Salary	Annual Incentive	Long-Term Equity Awards	Total
Eleanor R. Vasquez	1,250	1,890	4,200	7,340
Marcus T. Whitfield	780	980	1,850	3,610
Dr. Priya N. Anand	760	940	1,780	3,480
Jonas B. Hallström	740	910	1,690	3,340

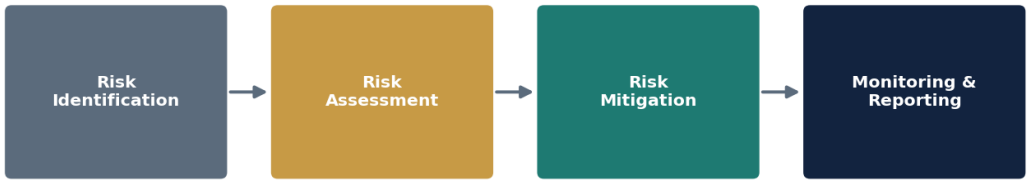

Board Independence & Committee Composition

Six of the Board's seven directors are independent under applicable listing standards. Dr. Harold F. Yamada serves as Lead Independent Director, providing an independent counterbalance to the combined Chairman and CEO role held by Eleanor R. Vasquez. Susan K. Delacroix chairs the Audit Committee, bringing over two decades of public company audit committee experience. Andre P. Lindqvist chairs the Risk Committee, and Walter B. Kincaid chairs the Compensation Committee.

13 Risk Management

Ardenmoor maintains an enterprise risk management program overseen by the Board's Risk Committee and administered by a dedicated Chief Risk function reporting to the Chief Financial Officer. Risks are identified, assessed, and mitigated through a structured quarterly review cycle.

Enterprise Risk Management Framework

Ardenmoor's enterprise risk management framework operates on a continuous quarterly cycle.

Principal Risks

Principal Risk Register (Abbreviated)

Risk Category	Description	Mitigation
Supply Chain	Dependency on select component suppliers	Dual-sourcing strategy; safety stock policy
Cybersecurity	Exposure to industrial control system attacks	Zero-trust architecture; 24/7 SOC monitoring
Regulatory	Evolving trade and emissions regulation	Dedicated compliance and government affairs team
Currency	Multi-currency revenue and cost exposure	Natural hedging and FX forward contracts
Talent	Competition for skilled engineering talent	Apprenticeship and retention programs
Climate & Physical Risk	Exposure of manufacturing sites to extreme weather events	Site resilience investment and geographic diversification of plants
Geopolitical & Trade	Tariff and export control changes affecting cross-border supply chains	Regional manufacturing redundancy and trade compliance monitoring

Risk Category	Description	Mitigation
Technology Obsolescence	Risk that competitor automation technology outpaces current product lines	Sustained R&D; investment and continuous product refresh cycles
Interest Rate	Exposure of floating-rate debt to rising interest rates	Mix of fixed and floating rate instruments; interest rate swaps on a portion of debt

Risk Discussion

Supply Chain Risk. Ardenmoor depends on a select group of suppliers for certain electronic components and specialty alloys. The company mitigates this exposure through a dual-sourcing strategy for critical components and maintains strategic safety stock levels calibrated to each component's lead time and criticality.

Cybersecurity Risk. As industrial control systems become increasingly connected, Ardenmoor faces heightened exposure to cybersecurity threats targeting plant floor operations. The company has implemented a zero-trust network architecture and maintains 24/7 monitoring through its Security Operations Center.

Regulatory Risk. Ardenmoor operates across 34 countries, each with evolving trade, labor, and environmental regulations. A dedicated compliance and government affairs function monitors regulatory developments and coordinates responses across the company's regional operating units.

Currency Risk. With revenue and costs denominated in multiple currencies, Ardenmoor is exposed to foreign exchange fluctuations. The company employs natural hedging where possible and enters into forward contracts to manage residual exposure on material transactions.

Talent Risk. Competition for skilled engineering and manufacturing talent remains intense across the industry. Ardenmoor's apprenticeship and retention programs are designed to build a durable talent pipeline and reduce reliance on external hiring in tight labor markets.

Climate & Physical Risk. A subset of Ardenmoor's manufacturing plants are located in regions with elevated exposure to extreme weather events. The company continues to invest in site resilience measures and evaluates geographic diversification when planning new capacity additions.

Geopolitical & Trade Risk. Changes in tariffs and export controls could affect the cost or feasibility of cross-border component sourcing. Ardenmoor maintains manufacturing redundancy across multiple regions to reduce dependence on any single trade corridor.

Technology Obsolescence Risk. Rapid advancement in automation and AI technology could erode the competitiveness of existing product lines. Sustained R&D investment and a structured product refresh cycle are intended to keep pace with the evolving competitive landscape.

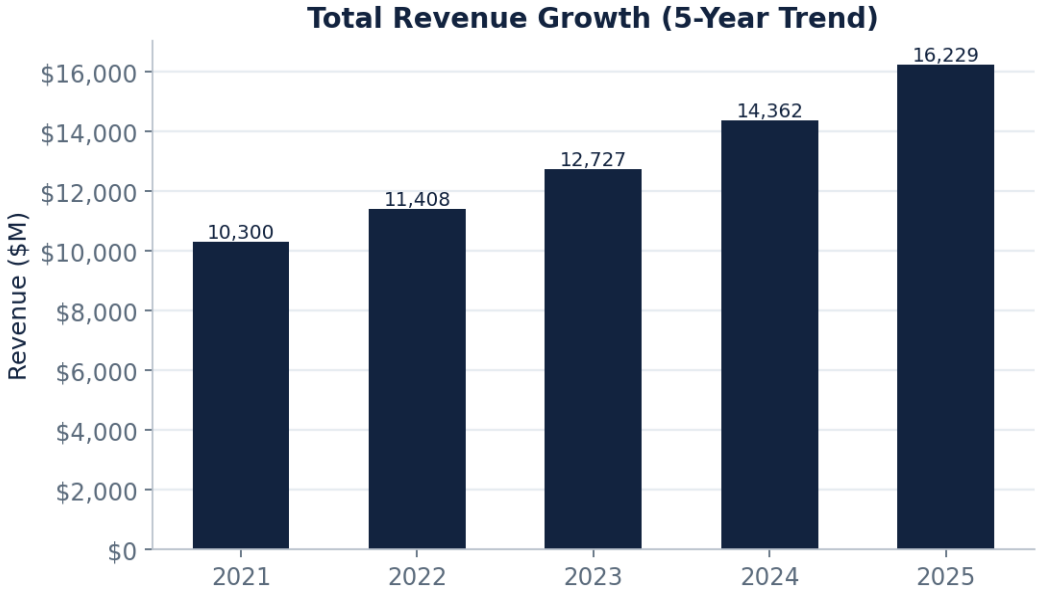

Interest Rate Risk. A portion of Ardenmoor's debt carries floating interest rates, exposing the company to changes in benchmark rates. Interest rate swaps on a portion of outstanding debt are used to manage this exposure.

Cybersecurity

Given the increasing connectivity of Ardenmoor's industrial control systems, the company maintains a dedicated Security Operations Center providing continuous monitoring, and follows a zero-trust architecture across its plant floor networks and enterprise IT systems.

14 Management Discussion & Analysis

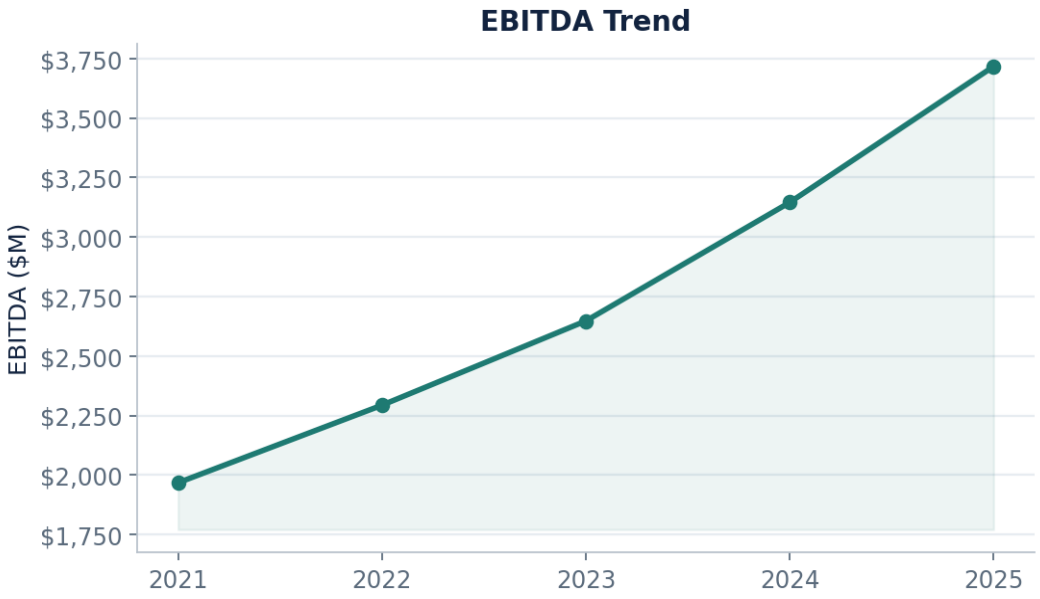

Total revenue for fiscal year 2025 increased to $16,229 million from $14,362 million in the prior year, representing growth of approximately 13 percent. This growth was broad-based across all four business segments, with particular strength in Renewable Energy Systems.

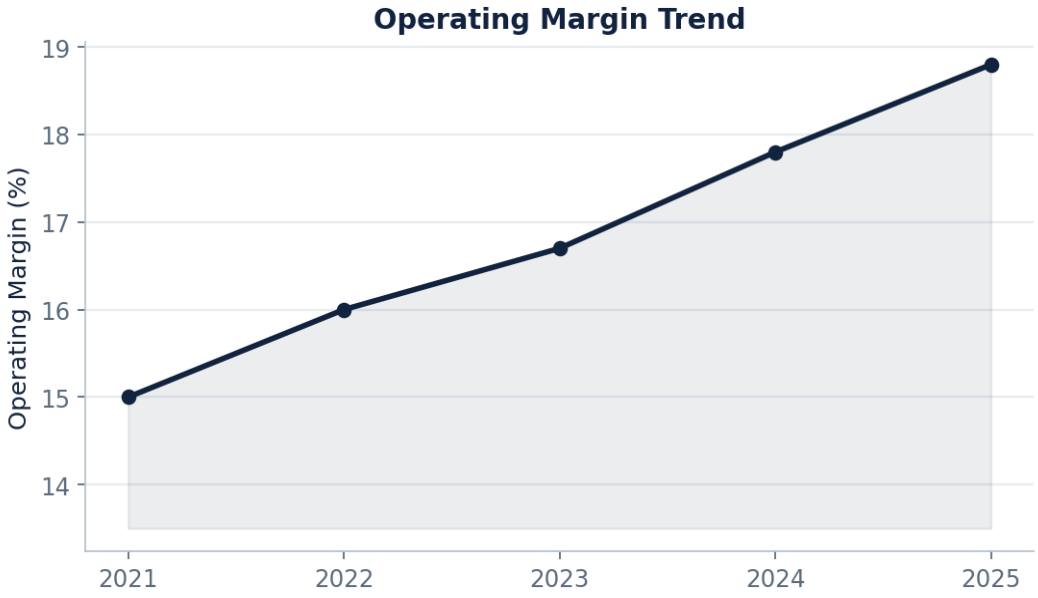

Total revenue has grown consistently over the five-year period.

Profitability

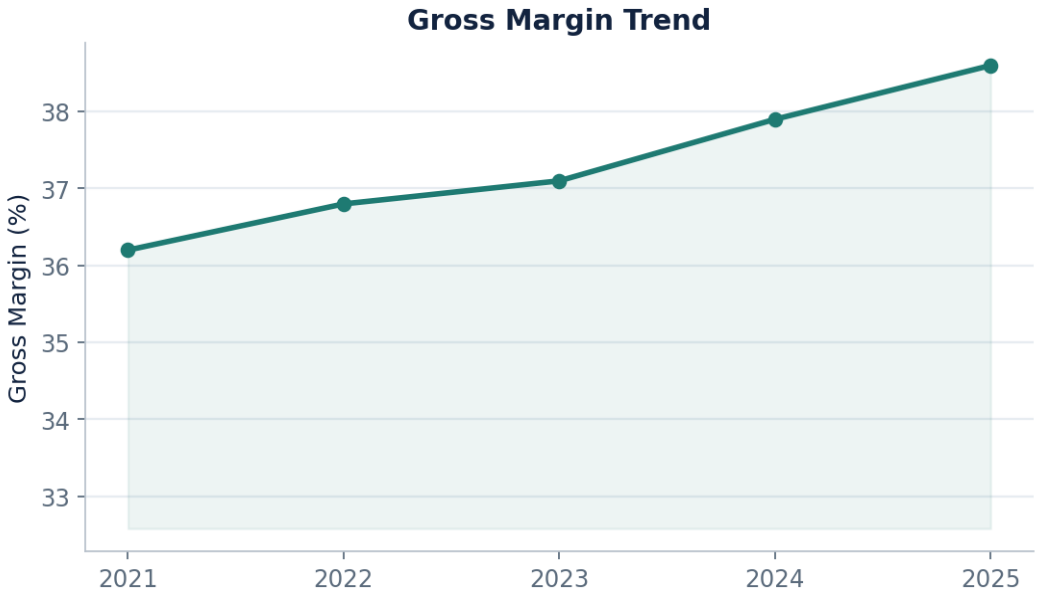

EBITDA margin expanded to 22.9 percent in FY2025 from 21.9 percent in the prior year, reflecting continued operating leverage, procurement efficiencies, and a favorable mix shift toward higher-margin services and digital solutions revenue.

EBITDA has grown at a faster rate than revenue, reflecting margin expansion.

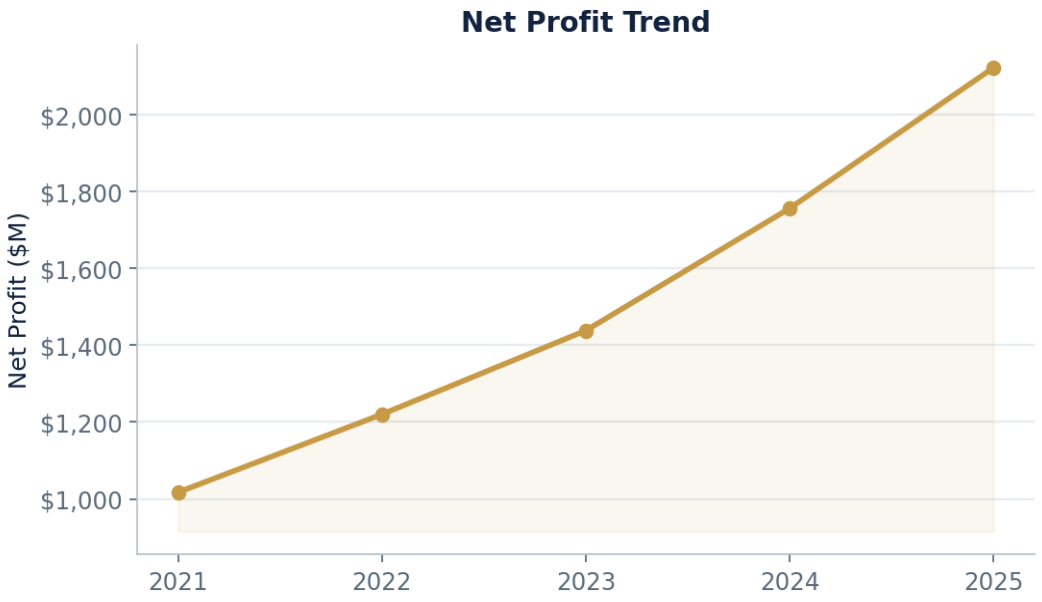

Operating margin trend over the five-year reporting period.

Gross margin has expanded steadily as a result of manufacturing efficiency initiatives.

Net Profit and Earnings Per Share

Net profit for FY2025 was $2,122 million, or $5.14 per diluted share, compared with $1,756 million, or $4.26 per diluted share, in the prior year.

Net profit trend over the five-year reporting period.

Quarterly Performance

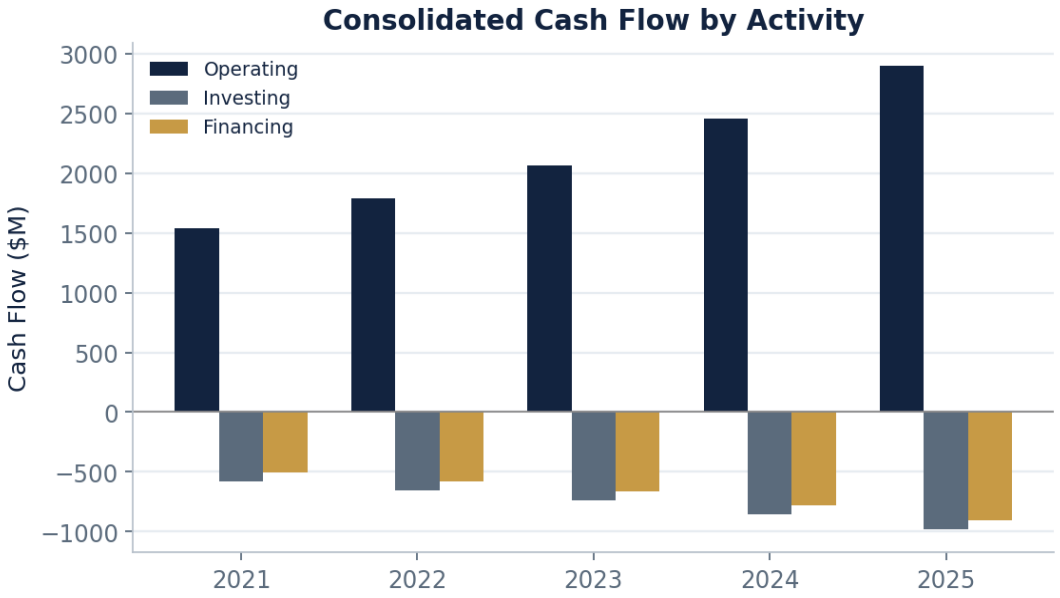

Revenue and profitability followed the company's typical seasonal pattern in FY2025, with the fourth quarter benefiting from year-end customer capital budget deployment across all four segments.

Quarterly Financial Performance, FY2025 ($ in millions)

Metric	Q1	Q2	Q3	Q4	Full Year
Revenue	3,732.7	3,895.0	4,057.3	4,544.2	16,229.2
EBITDA	854.8	892.0	929.1	1,040.6	3,716.5
Net Profit	488.1	509.3	530.5	594.2	2,122.2

Liquidity and Capital Resources

Cash flow from operations totaled $2,899 million in FY2025, supporting continued investment in capital expenditure of $909 million and dividend payments of $679 million, while maintaining a disciplined leverage profile with a debt-to-equity ratio of 0.55.

Consolidated cash flow by activity across the five-year period.

Key Financial Ratios

The table below summarizes Ardenmoor's principal financial ratios over the five-year reporting period, reflecting consistent improvement in profitability and capital efficiency alongside a stable balance sheet position.

Key Financial Ratios

Ratio	2021	2022	2023	2024	2025
Gross Margin (%)	36.2%	36.8%	37.1%	37.9%	38.6%
EBITDA Margin (%)	19.1%	20.1%	20.8%	21.9%	22.9%
Operating Margin (%)	15.0%	16.0%	16.7%	17.8%	18.8%
Net Margin (%)	9.9%	10.7%	11.3%	12.2%	13.1%
Return on Equity (%)	22.5%	24.8%	26.8%	30.3%	34.0%
Return on Capital Employed (%)	20.6%	22.6%	24.4%	27.4%	30.6%
Debt-to-Equity Ratio	0.61	0.60	0.58	0.57	0.55
Current Ratio	1.60	1.62	1.64	1.65	1.67

Operating Statistics

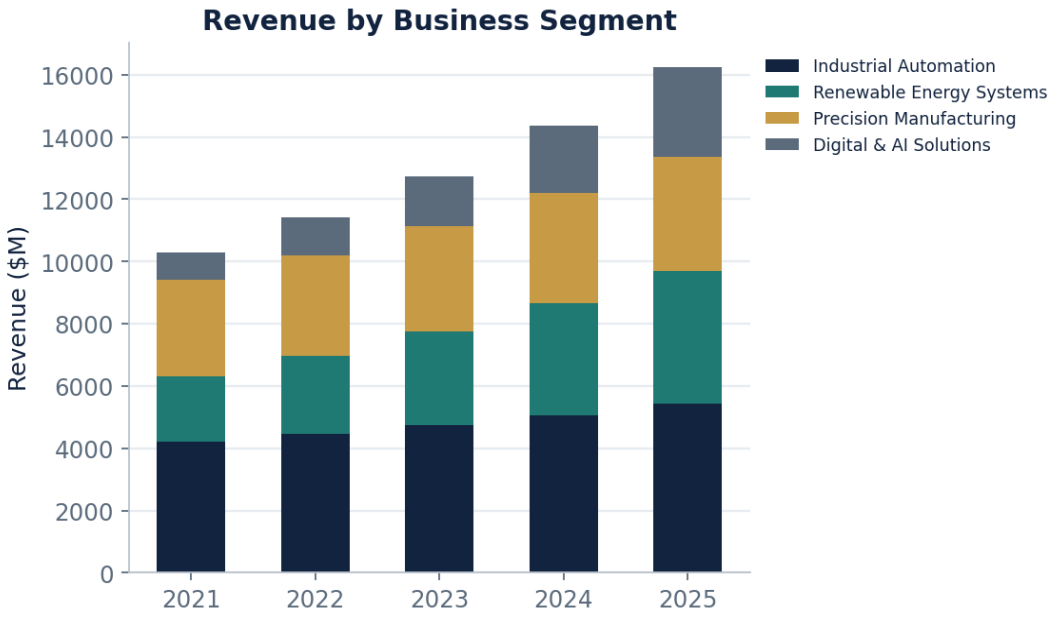

Beyond financial metrics, management tracks a set of operating statistics that provide additional insight into the underlying performance of the business, including units shipped, on-time delivery performance, and the continued expansion of the company's manufacturing and geographic footprint.

Operating Statistics

Statistic	2021	2022	2023	2024	2025
Units Shipped (millions)	18.2	19.6	21.4	23.8	26.7
On-Time Delivery Rate (%)	91%	92%	94%	95%	96%
Manufacturing Plants	16	17	18	19	21
Countries of Operation	27	29	31	32	34

15 Business Segment Performance

Ardenmoor reports its results across four operating segments: Industrial Automation, Renewable Energy Systems, Precision Manufacturing, and Digital & AI Solutions. The following section reviews the financial performance of each segment for fiscal year 2025.

Revenue contribution by business segment over the five-year reporting period.

Revenue by Business Segment ($ in millions)

Segment	2021	2022	2023	2024	2025
Industrial Automation	4,200.0	4,472.9	4,735.0	5,049.8	5,429.7
Renewable Energy Systems	2,100.0	2,494.1	3,007.3	3,601.8	4,269.3
Precision Manufacturing	3,100.0	3,240.6	3,387.6	3,565.1	3,675.2
Digital & AI Solutions	900.0	1,200.9	1,597.1	2,145.1	2,855.0
Total	10,300.0	11,408.5	12,727.0	14,361.8	16,229.2

Industrial Automation

Industrial Automation generated $5,430 million in FY2025 revenue, driven by continued demand for robotic assembly systems and control modules across automotive and general industrial customers.

Renewable Energy Systems

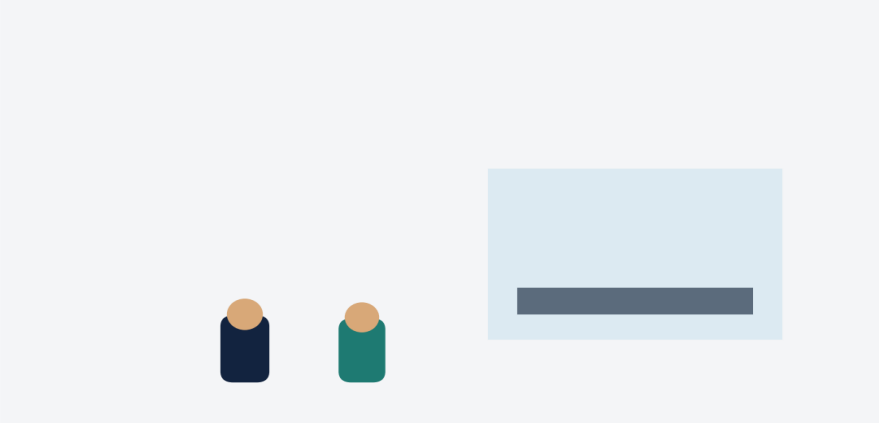

Renewable Energy Systems revenue reached $4,269 million, the fastest-growing segment in the portfolio, supported by expanded solar module and grid storage component manufacturing capacity.

Precision Manufacturing

Precision Manufacturing contributed $3,675 million, reflecting steady demand from aerospace and defense supply chain customers under multi-year contracts.

Digital & AI Solutions

Digital & AI Solutions revenue grew to $2,855 million, as customers increasingly adopted Ardenmoor's predictive maintenance and digital twin software offerings alongside hardware purchases.

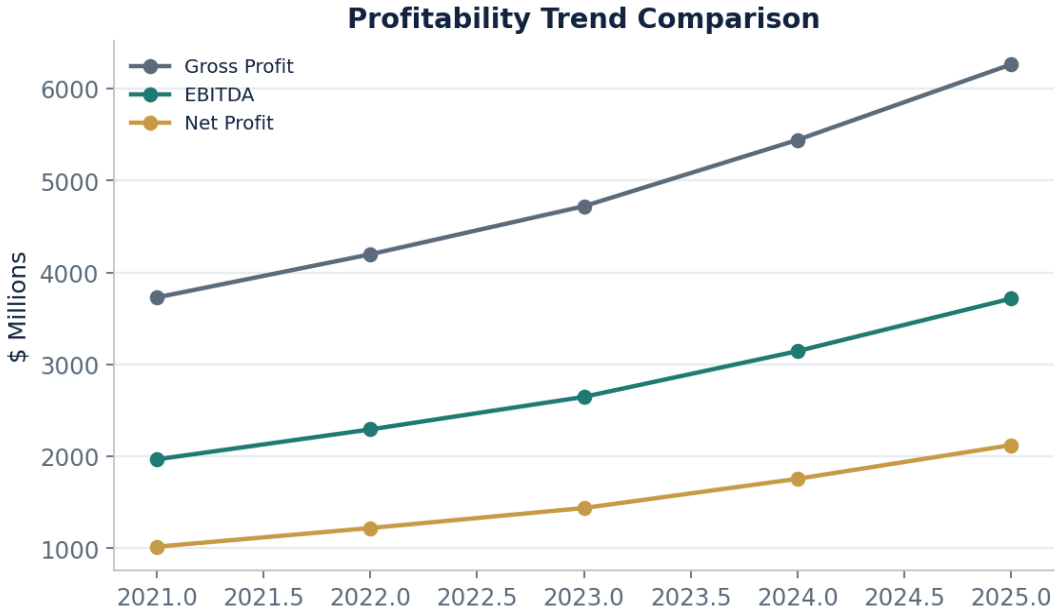

Engineering Review — Robotics Systems Lab

Engineering review session for the Renewable Energy Systems segment.

16 Financial Highlights

Five-Year Financial Summary ($ in millions, except per-share data)

Metric	2021	2022	2023	2024	2025
Total Revenue	10,300.0	11,408.5	12,727.0	14,361.8	16,229.2
EBITDA	1,967.3	2,293.1	2,647.2	3,145.2	3,716.5
Net Profit	1,017.3	1,220.3	1,438.2	1,756.0	2,122.2
Total Assets	9,829.3	10,575.5	11,361.4	12,111.5	12,909.1
Total Equity	4,521.5	4,928.2	5,362.6	5,789.3	6,248.0
EPS ($)	2.47	2.96	3.49	4.26	5.14
Dividend Per Share ($)	0.68	0.75	0.82	0.89	0.96

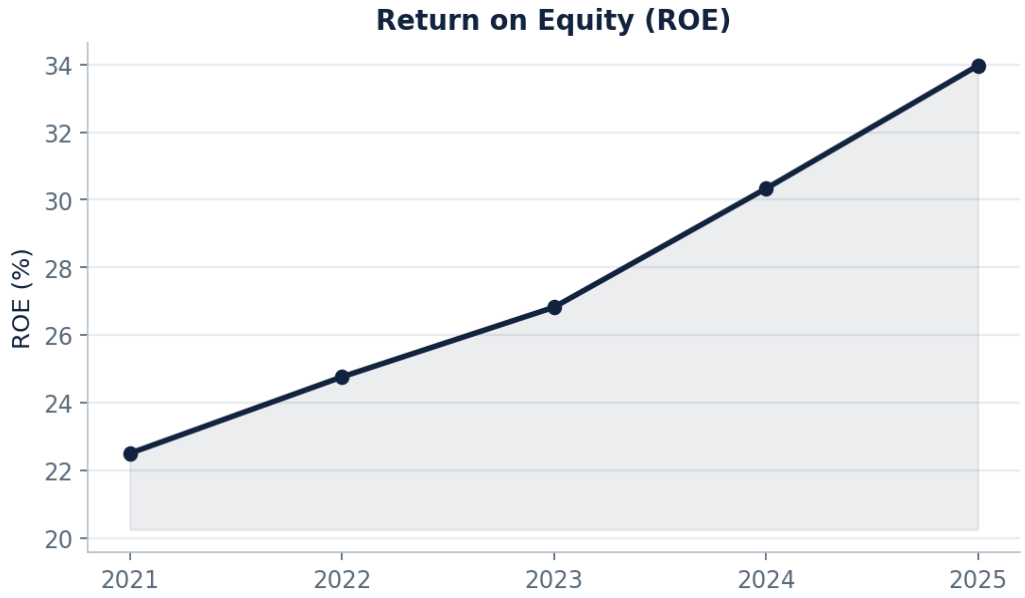

Gross profit, EBITDA, and net profit trends compared over the five-year period.

Key Performance Indicators

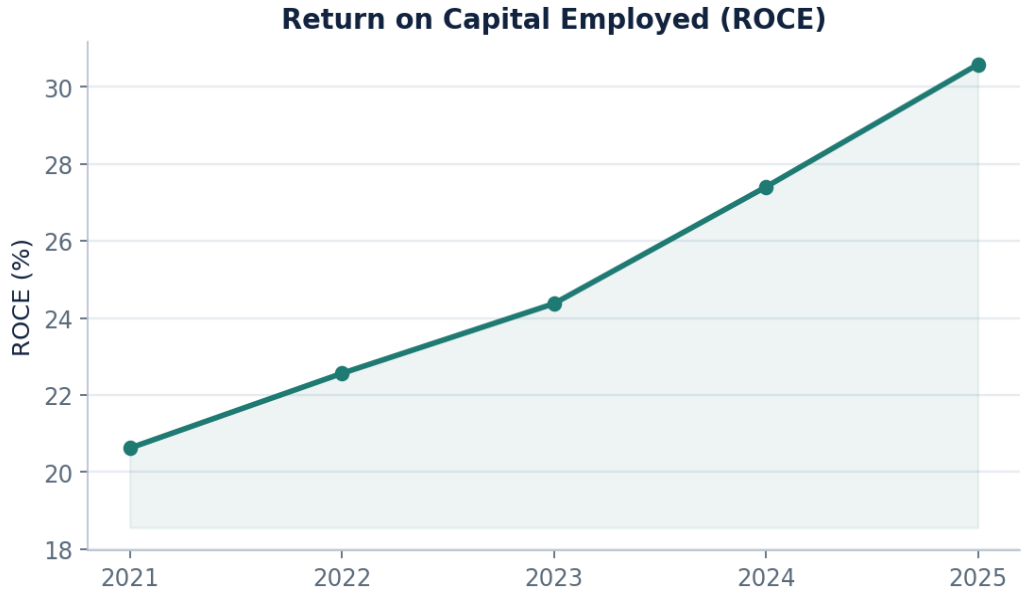

Key Performance Indicator Summary, FY2025

KPI	FY2025 Value
Revenue Growth (YoY)	13.0%
EBITDA Margin	22.9%
Net Margin	13.1%
Return on Equity	34.0%

KPI	FY2025 Value
Employee Count	46,782
Market Share	16.6%

Return on equity has improved steadily, reflecting margin expansion and disciplined capital allocation.

Return on capital employed trend over the five-year reporting period.

Ten-Year Selected Financial Data

The following table presents ten years of selected financial data, providing longer-term context for the detailed five-year trends presented elsewhere in this report.

Ten-Year Selected Financial Data ($ in millions, except per-share data)

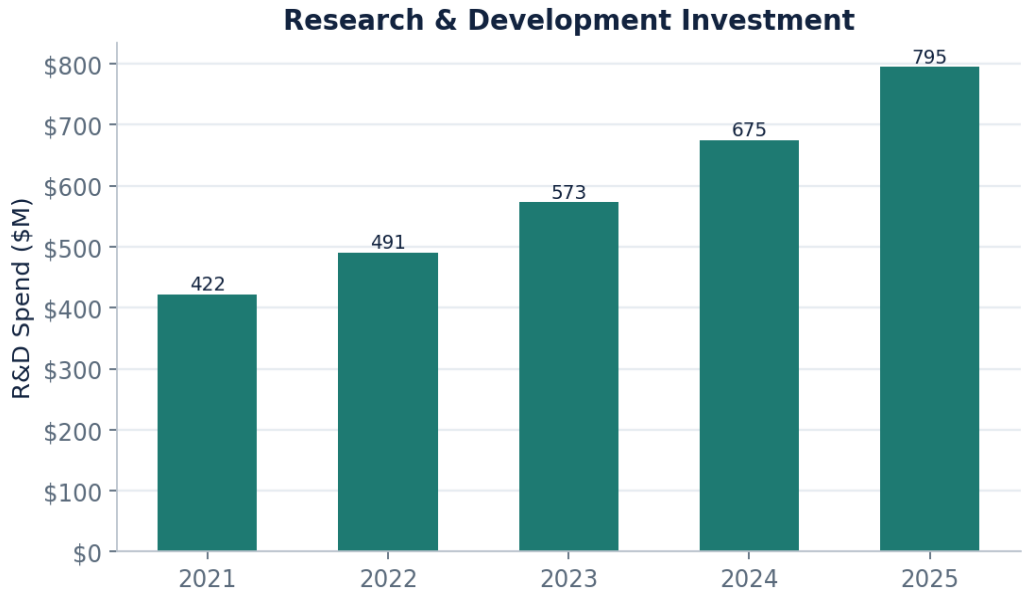

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Total Revenue	8,255	8,899	9,593	10,342	11,148	12,018	12,955	13,966	15,055	16,229
Net Profit	977	1,065	1,161	1,265	1,379	1,503	1,639	1,786	1,947	2,122

17 Income Statement

The following table presents Ardenmoor's consolidated income statement for the five most recent fiscal years, prepared on a fictional basis consistent with the illustrative financial model underlying this report.

Consolidated Income Statement ($ in millions)

Line Item	2021	2022	2023	2024	2025
Total Revenue	10,300.0	11,408.5	12,727.0	14,361.8	16,229.2
Gross Profit	3,728.6	4,198.3	4,721.7	5,443.1	6,264.5
Operating Expenses	2,039.4	2,213.2	2,430.9	2,700.0	2,969.9
EBITDA	1,967.3	2,293.1	2,647.2	3,145.2	3,716.5
Depreciation & Amortization	422.3	467.7	521.8	588.8	665.4
Operating Profit (EBIT)	1,545.0	1,825.4	2,125.4	2,556.4	3,051.1
Interest Expense	210.0	224.0	238.0	252.0	266.0
Profit Before Tax	1,335.0	1,601.4	1,887.4	2,304.4	2,785.1
Income Tax Expense	317.7	381.1	449.2	548.4	662.9
Net Profit	1,017.3	1,220.3	1,438.2	1,756.0	2,122.2
Earnings Per Share ($)	2.47	2.96	3.49	4.26	5.14

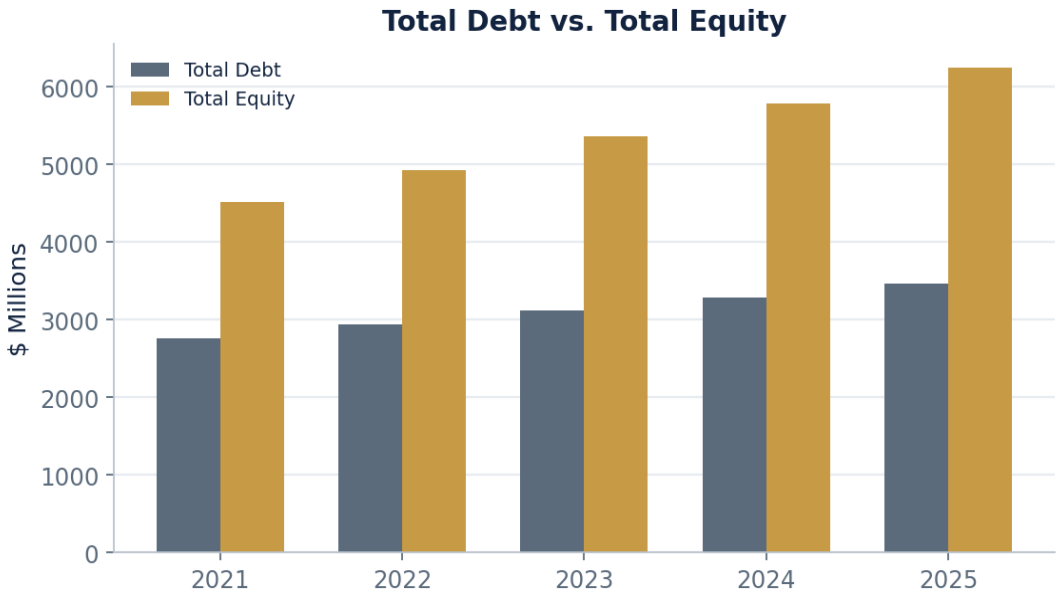

Research and development investment has grown as a share of revenue over the reporting period.

18 Balance Sheet

Consolidated Balance Sheet ($ in millions)

Line Item	2021	2022	2023	2024	2025
Cash & Cash Equivalents	845.3	909.5	977.1	1,041.6	1,110.2
Inventory	1,189.3	1,279.6	1,374.7	1,465.5	1,562.0
Total Current Assets	3,735.1	4,018.7	4,317.3	4,602.4	4,905.5
Property, Plant & Equipment (net)	3,342.0	3,595.7	3,862.9	4,117.9	4,389.1
Goodwill & Intangibles	1,425.2	1,533.4	1,647.4	1,756.2	1,871.8
Total Assets	9,829.3	10,575.5	11,361.4	12,111.5	12,909.1
Total Current Liabilities	2,335.4	2,484.8	2,639.5	2,781.8	2,930.9
Total Debt	2,760.1	2,936.6	3,119.4	3,287.5	3,463.8
Total Liabilities	5,307.8	5,647.3	5,998.8	6,322.2	6,661.1
Total Shareholders' Equity	4,521.5	4,928.2	5,362.6	5,789.3	6,248.0

Total debt and total equity have grown in tandem, maintaining a stable capital structure.

Asset & Liability Composition

Asset Composition, FY2025 ($ in millions)

Asset Class	FY2025 Value
Cash & Equivalents	1,110.2
Accounts Receivable	1,420.0

Asset Class	FY2025 Value
Inventory	1,562.0
Property, Plant & Equipment	4,389.1
Goodwill & Intangibles	1,871.8
Other Long-Term Assets	774.5

Liability Composition, FY2025 ($ in millions)

Liability Class	FY2025 Value
Accounts Payable	1,265.6
Short-Term Debt	762.0
Long-Term Debt	2,701.8
Accrued Liabilities	732.7
Deferred Tax & Other	532.9

Inventory Composition, FY2025 ($ in millions)

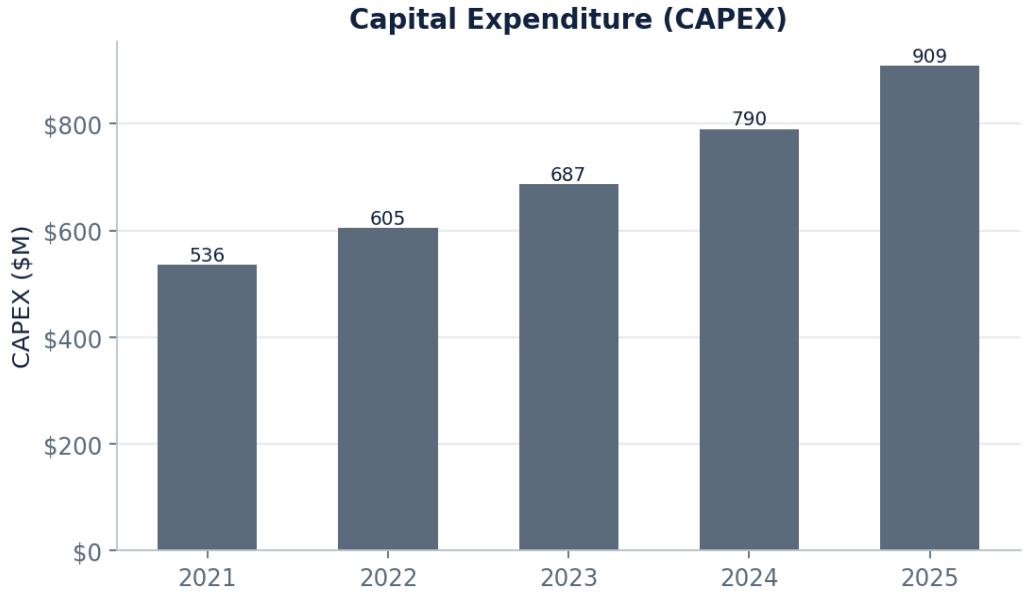

Category	Value	% of Total
Raw Materials	612.4	31%
Work-in-Progress	487.9	25%
Finished Goods	704.2	36%
Spare Parts & Consumables	153.6	8%

19 Cash Flow Statement

Consolidated Statement of Cash Flows ($ in millions)

Line Item	2021	2022	2023	2024	2025
Cash Flow from Operations	1,534.5	1,788.6	2,064.8	2,453.3	2,898.9
Cash Flow from Investing	-578.4	-653.1	-742.3	-853.1	-981.5
Cash Flow from Financing	-505.5	-582.5	-664.2	-777.9	-907.1
Net Change in Cash	450.6	553.0	658.3	822.3	1,010.3
Free Cash Flow	998.9	1,183.9	1,377.5	1,663.4	1,990.1
Capital Expenditure	535.6	604.7	687.3	789.9	908.8
Dividends Paid	325.5	390.5	460.2	561.9	679.1

Free cash flow, defined as cash flow from operations less capital expenditure, totaled $1,990 million in FY2025, an increase of approximately 19.6 percent over the prior year, supporting continued investment in growth capital projects alongside shareholder returns.

Capital expenditure has scaled in line with the company's growth investment priorities.

20 Statement of Changes in Equity

The Statement of Changes in Equity summarizes movements in Ardenmoor's shareholders' equity over the fiscal year, including net profit, dividend distributions, share repurchases, and other comprehensive income items.

Item	$ Millions
Opening Balance, FY2025	5,789.3
Net Profit for the Year	2,122.2
Dividends Declared	(679.1)
Share Repurchases	(142.5)
Other Comprehensive Income	38.2
Closing Balance, FY2025	6,248.0

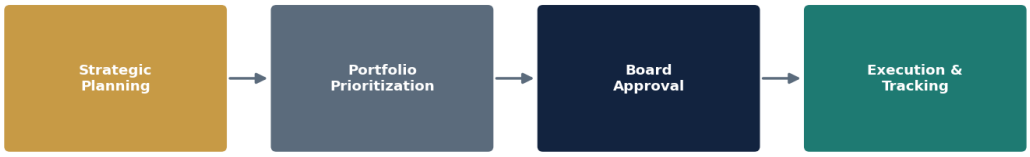

Capital Allocation Summary, FY2025 ($ in millions)

Use of Capital	Amount
Capital Expenditure	908.8
Research & Development	795.2
Dividends to Shareholders	679.1
Debt Repayment	228.0
Share Repurchases	142.5

Capital Allocation Governance

Capital allocation decisions, including share repurchases and changes to the dividend program, follow a structured process beginning with strategic planning and portfolio prioritization, culminating in Board approval and ongoing execution tracking.

Capital Allocation Process

The capital allocation process, from strategic planning through execution and tracking.

21 Financial Notes

The following notes provide supplementary detail to the consolidated financial statements presented in this report. These notes are illustrative and prepared solely for the purpose of this fictional annual report.

Selected Notes to the Financial Statements

Note	Summary
Note 1	Basis of preparation and use of estimates under fictional reporting standards
Note 2	Revenue recognition policy across product and service contracts
Note 3	Property, plant & equipment — depreciation methods and useful lives
Note 4	Goodwill and intangible assets — impairment testing methodology
Note 5	Employee benefit obligations and post-retirement plans
Note 6	Contingent liabilities and commitments

Note 1 — Basis of Preparation

These illustrative financial statements are prepared on a fictional basis consistent with the financial model underlying this report and are not intended to represent compliance with any actual accounting standard. Management estimates are used throughout, including in the valuation of inventory, useful lives of fixed assets, and assumptions underlying employee benefit obligations.

Note 2 — Revenue Recognition

Hardware product revenue is recognized at the point in time control transfers to the customer, typically upon shipment or delivery depending on contract terms. Service and software subscription revenue is recognized ratably over the contract term, reflecting the ongoing nature of the performance obligation.

Note 3 — Property, Plant & Equipment

Property, plant, and equipment is stated at cost less accumulated depreciation. Depreciation is calculated on a straight-line basis over estimated useful lives ranging from 15 to 30 years for buildings and 5 to 12 years for manufacturing equipment.

Note 4 — Goodwill and Intangible Assets

Goodwill is tested for impairment annually, or more frequently if events indicate that the carrying value may not be recoverable. No impairment was recorded during fiscal year 2025 under the illustrative assumptions used in this report.

Note 5 — Employee Benefit Obligations

Ardenmoor maintains defined contribution retirement plans for the substantial majority of its workforce, along with a legacy defined benefit plan covering a small number of long-tenured employees in certain European jurisdictions, which is closed to new participants.

Note 6 — Contingent Liabilities and Commitments

In the ordinary course of business, Ardenmoor is subject to various claims and legal proceedings. Management does not believe that any currently pending matters, individually or in aggregate, would have a material adverse effect on the company's illustrative financial position.

Debt Maturity Schedule

Long-Term Debt Maturity Schedule ($ in millions)

Maturity Year	Principal Due	Interest Rate
2026	310.0	4.10%
2027	420.5	4.25%
2028	512.0	4.35%
2029	398.0	4.50%
2030 and beyond	1,240.0	4.60%

Related Party Transactions

Ardenmoor discloses transactions with related parties in the ordinary course of business, none of which were material to the company's consolidated financial position in FY2025.

Related Party Transactions, FY2025

Related Party	Nature of Transaction	Value ($M)
Ardenmoor Employee Stock Ownership Plan	Share issuances under employee ownership plan	24.6
Non-executive director consulting arrangement	Advisory services related to Asia-Pacific expansion	1.2

Subsequent Events

Management has evaluated events occurring after the fiscal year-end through the date these financial statements were issued and has determined that no subsequent events require adjustment to, or disclosure within, the consolidated financial statements presented in this report.

Cautionary Statement Regarding Forward-Looking Statements

This report contains forward-looking statements regarding future financial performance, strategic priorities, and sustainability commitments. These statements are based on current expectations and assumptions and are subject to risks and uncertainties, including those described in the Risk Management section of this report, that could cause actual results to differ materially. As this document is a wholly fictional illustration, no actual forward-looking commitments are being made by any real entity.

22 Shareholding Pattern

As of the end of fiscal year 2025, Ardenmoor Industries Corporation had approximately 412.5 million diluted shares outstanding. The following table summarizes the company's shareholding pattern by investor category.

Shareholding Pattern, FY2025

Category	% Ownership
Institutional Investors	58%
Founding Family & Executives	14%
Public Float (Retail)	22%
Employee Stock Ownership Plan	4%
Treasury Shares	2%

Institutional Ownership

Institutional investors, including index funds, pension funds, and actively managed asset managers, collectively hold approximately 58 percent of outstanding shares. Ardenmoor's Investor Relations team maintains regular dialogue with its largest institutional holders through quarterly earnings calls, an annual investor day, and periodic one-on-one meetings.

Insider Ownership

Members of the founding family and current executive officers collectively hold approximately 14 percent of outstanding shares, reflecting continued alignment between management and long-term shareholder interests.

Principal Subsidiaries and Ownership

Ardenmoor conducts a portion of its international operations through wholly and majority owned subsidiaries, each aligned to a specific operating segment and geography.

Principal Subsidiaries

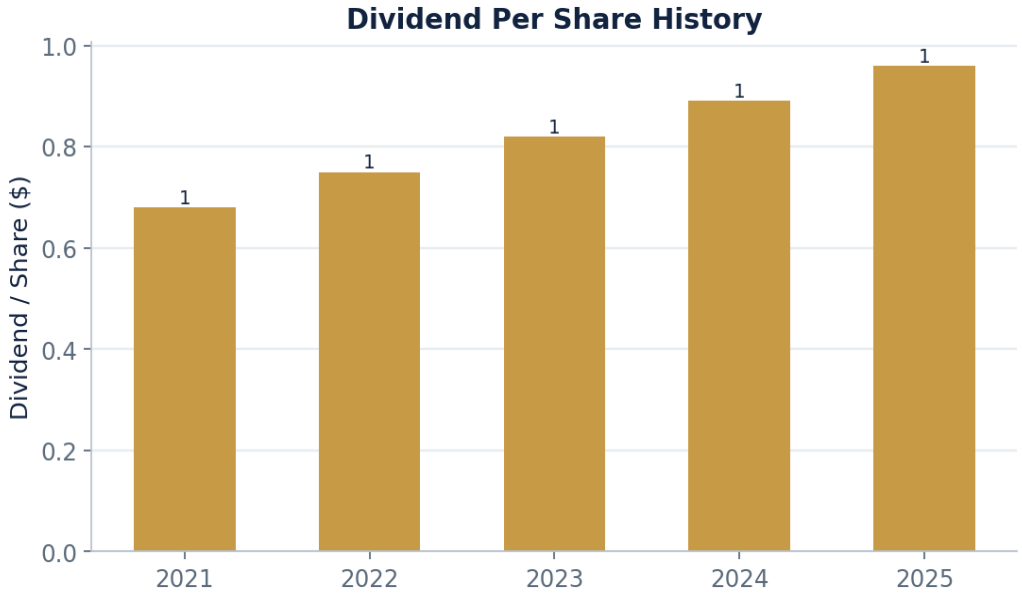

Subsidiary	Jurisdiction	Ownership	Segment
Ardenmoor Automation GmbH	Germany	100%	Industrial Automation
Ardenmoor Renewables LLC	United States	100%	Renewable Energy Systems
Ardenmoor Precision Asia Pte. Ltd.	Singapore	100%	Precision Manufacturing
Ardenmoor Digital Solutions Inc.	United States	100%	Digital & AI Solutions
Ardenmoor de Mexico S.A. de C.V.	Mexico	85%	Precision Manufacturing
Ardenmoor Africa (Pty) Ltd.	South Africa	70%	Industrial Automation

23 Dividend Policy

Ardenmoor's Board of Directors targets a dividend payout ratio of approximately 30 to 35 percent of net profit, balanced against the company's capital expenditure requirements and growth investment priorities. The Board reviews the dividend policy annually.

Dividend History

Year	Dividend Per Share ($)	Payout Ratio (%)
2021	0.68	27.6%
2022	0.75	25.4%
2023	0.82	23.5%
2024	0.89	20.9%
2025	0.96	18.7%

Dividend per share has grown consistently alongside earnings over the five-year period.

The Board declared a dividend of $0.96 per share for fiscal year 2025, representing a payout ratio of approximately 18.7 percent of net profit, consistent with the company's stated policy.

Share Repurchase Program

In addition to its regular dividend, Ardenmoor maintains an ongoing share repurchase authorization, which the Board uses opportunistically to return excess capital to shareholders beyond the level of the regular dividend, subject to prevailing market conditions and the company's near-term capital investment requirements.

Historical Context

Ardenmoor has paid an uninterrupted quarterly dividend since its 2008 public listing, and has increased its per-share dividend in each of the past five fiscal years, reflecting the Board's confidence in the durability of the company's cash flow generation.

24 Subsidiaries

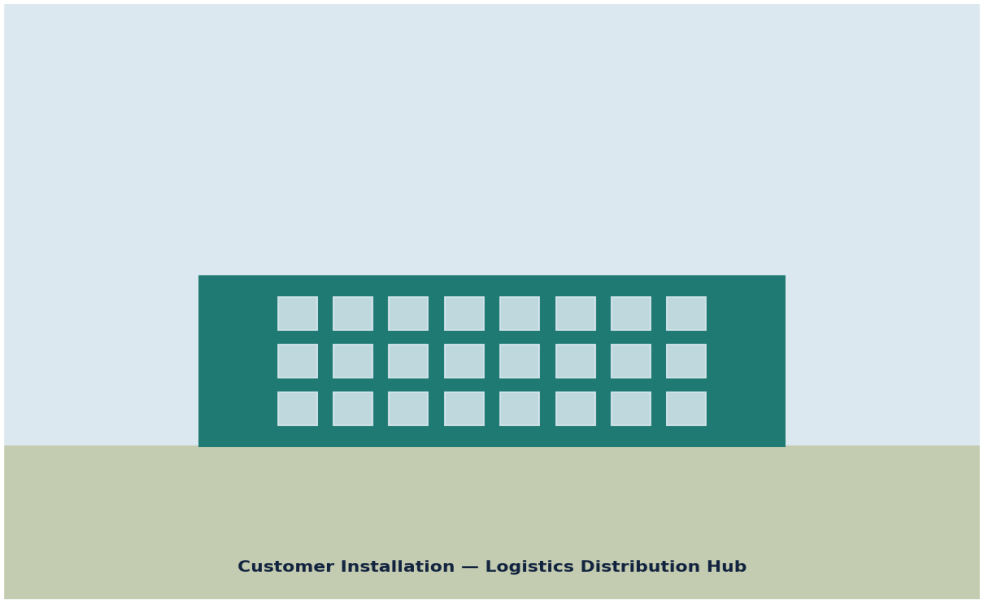

Ardenmoor's principal subsidiaries support local manufacturing, sales, and regulatory compliance across the company's key operating jurisdictions. Each subsidiary maintains its own local board of directors or management committee, reporting into the relevant segment leadership team.

Principal Subsidiaries

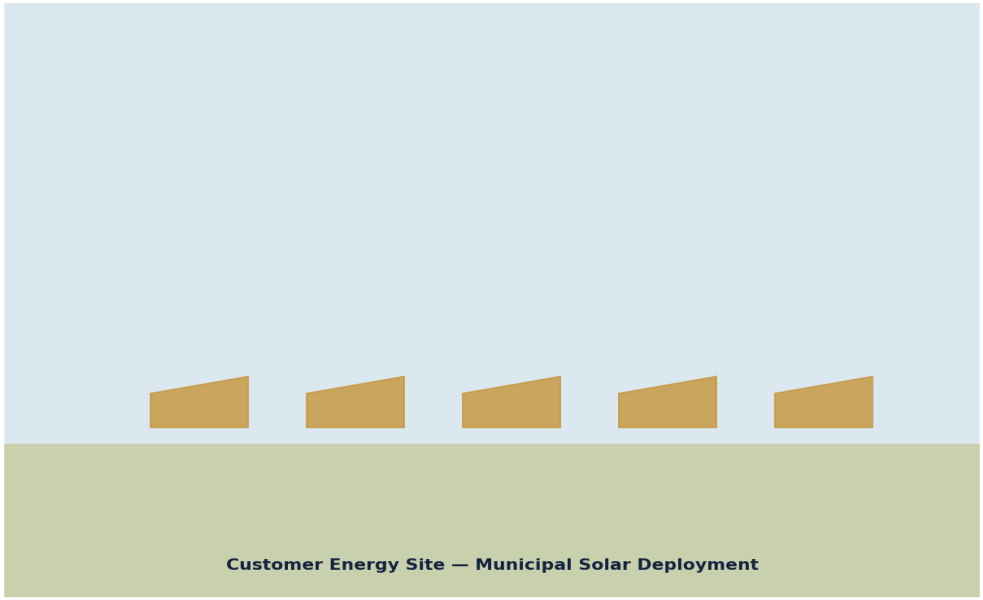

Subsidiary	Jurisdiction	Ownership	Segment
Ardenmoor Automation GmbH	Germany	100%	Industrial Automation
Ardenmoor Renewables LLC	United States	100%	Renewable Energy Systems
Ardenmoor Precision Asia Pte. Ltd.	Singapore	100%	Precision Manufacturing
Ardenmoor Digital Solutions Inc.	United States	100%	Digital & AI Solutions
Ardenmoor de Mexico S.A. de C.V.	Mexico	85%	Precision Manufacturing
Ardenmoor Africa (Pty) Ltd.	South Africa	70%	Industrial Automation

A customer installation supported by Ardenmoor Precision Asia Pte. Ltd.

A logistics distribution hub equipped with Ardenmoor automation systems.

A municipal solar deployment supported by Ardenmoor Renewables LLC.

Subsidiary Profiles

Ardenmoor Automation GmbH (Germany, 100% owned) operates the Bavaria manufacturing plant and serves as the engineering center for the company's European industrial automation customers.

Ardenmoor Renewables LLC (United States, 100% owned) manages the company's solar module and grid storage component manufacturing operations, including the Austin, Texas facility.

Ardenmoor Precision Asia Pte. Ltd. (Singapore, 100% owned) coordinates precision manufacturing and digital solutions development across the Asia-Pacific region.

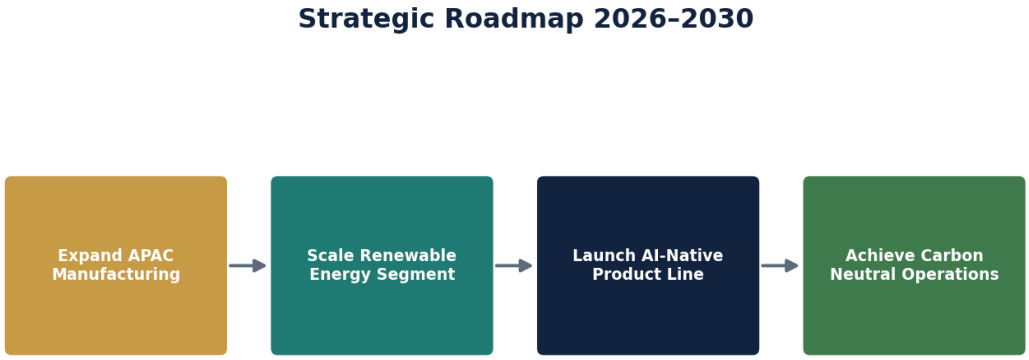

Ardenmoor Digital Solutions Inc. (United States, 100% owned) develops and commercializes the company's predictive maintenance and digital twin software products.

Ardenmoor de Mexico S.A. de C.V. (Mexico, 85% owned) supports nearshore precision manufacturing for the North American market, with the remaining 15 percent held by a local minority investor.

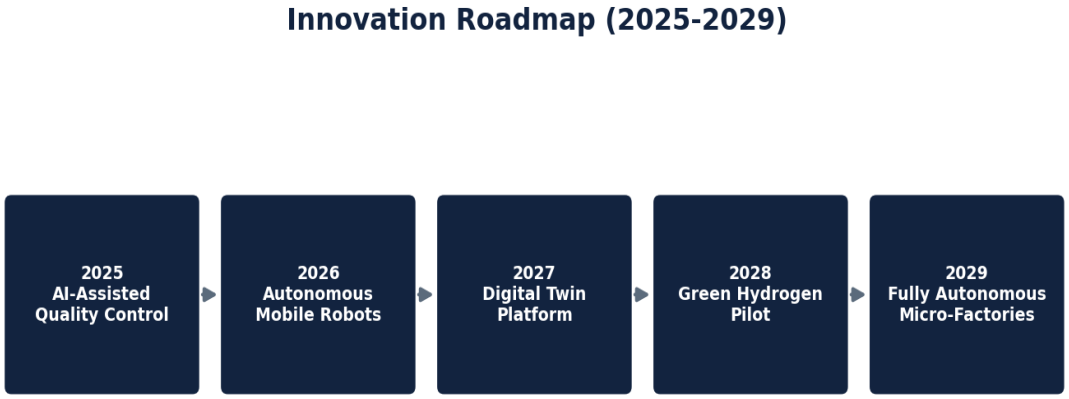

Ardenmoor Africa (Pty) Ltd. (South Africa, 70% owned) serves as the company's regional platform for industrial automation sales and support across sub-Saharan Africa, with the remaining 30 percent held by local partners.

25 Future Outlook

Looking ahead to fiscal year 2026 and beyond, Ardenmoor's strategic priorities center on four areas: expanding Asia-Pacific manufacturing capacity, scaling the Renewable Energy Systems segment, launching new AI-native product lines, and advancing the company's carbon-neutrality commitments.

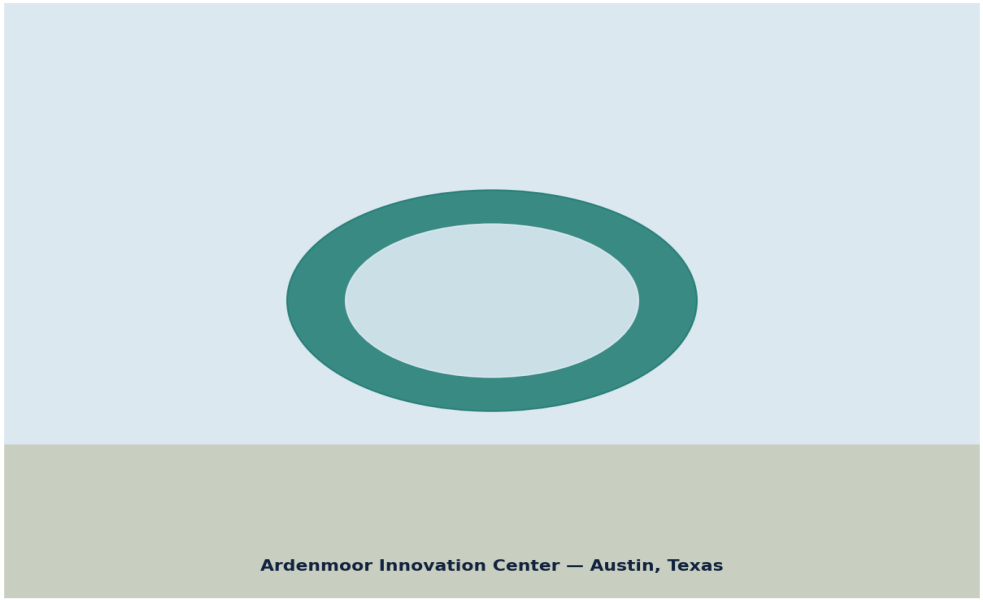

Ardenmoor's strategic roadmap for 2026 through 2030.

Ardenmoor's product innovation roadmap through 2029.

Guidance

Management expects continued revenue growth in the high single digits to low double digits for fiscal year 2026, with further margin expansion as scale efficiencies continue across the manufacturing network and higher-margin digital services revenue continues to grow as a share of the overall business.

The Ardenmoor Innovation Center in Austin, Texas, will anchor the company's next-generation product development.

26 Glossary

EBITDA — Earnings before interest, taxes, depreciation, and amortization.

CAPEX — Capital expenditure — funds used to acquire, upgrade, or maintain physical assets.

ROE — Return on equity — net profit divided by total shareholders' equity.

ROCE — Return on capital employed — operating profit divided by capital employed.

Free Cash Flow — Cash flow from operations less capital expenditure.

ESG — Environmental, Social, and Governance — a framework for evaluating corporate sustainability practices.

Scope 1 Emissions — Direct greenhouse gas emissions from owned or controlled sources.

Scope 2 Emissions — Indirect emissions from the generation of purchased electricity, steam, heat, or cooling.

Scope 3 Emissions — All other indirect emissions occurring in a company's value chain.

OEM — Original Equipment Manufacturer — a company whose products are used as components in another company's products.

AGV — Autonomous Guided Vehicle — a mobile robot used to transport materials within a facility.

Digital Twin — A virtual representation of a physical asset or system used for simulation and predictive analysis.

EPS — Earnings per share — net profit divided by the weighted average number of diluted shares outstanding.

Payout Ratio — The proportion of net profit distributed to shareholders as dividends.

Current Ratio — Current assets divided by current liabilities, a measure of short-term liquidity.

Gross Margin — Gross profit divided by total revenue, expressed as a percentage.

Operating Margin — Operating profit (EBIT) divided by total revenue, expressed as a percentage.

Net Margin — Net profit divided by total revenue, expressed as a percentage.

Debt-to-Equity Ratio — Total debt divided by total shareholders' equity, a measure of financial leverage.

Working Capital — Current assets less current liabilities, representing short-term operational liquidity.

Goodwill — An intangible asset representing the excess of purchase price over fair value of net assets acquired in a business combination.

Depreciation & Amortization — The systematic allocation of the cost of tangible and intangible assets over their useful lives.

Tier-1 Supplier — A supplier that provides components or materials directly to the manufacturer.

Tier-2 Supplier — A supplier that provides components or materials to a tier-1 supplier rather than directly to the manufacturer.

Predictive Maintenance — The use of sensor data and analytics to anticipate equipment failures before they occur.

Statistical Process Control — A quality control method using statistical methods to monitor and control a manufacturing process.

Zero-Trust Architecture — A cybersecurity model that requires strict identity verification for every person and device accessing a network, regardless of location.

Carbon Neutrality — A state in which net greenhouse gas emissions are reduced to zero, typically through a combination of emissions reduction and offsetting.

Free Float — The portion of a company's shares that are available for public trading, excluding closely held or restricted shares.

Total Recordable Incident Rate — A standardized measure of workplace injury frequency per 100 full-time workers over a one-year period.

This annual report is a wholly fictional document created for the purpose of software testing and demonstration. Ardenmoor Industries Corporation, its officers, directors, products, subsidiaries, and all financial figures presented herein are fictitious and do not represent any real company, person, or financial data.

27 Appendix A: Segment Financial Detail

This appendix provides additional financial detail for each of Ardenmoor's four reportable business segments for fiscal year 2025, supplementing the segment revenue figures presented earlier in this report with segment-level profitability, capital expenditure, and headcount data.

Industrial Automation

The company's largest and most mature segment, Industrial Automation delivers steady margins supported by a broad installed base and recurring maintenance revenue.

Industrial Automation — FY2025 Segment Financial Detail ($ in millions)

Metric	FY2025
Segment Revenue	5,429.7
Segment Operating Profit	1,167.4
Segment Operating Margin	21.5%
Segment Capital Expenditure	345.3
Segment Headcount	15,905

6-Axis Robotic Arm — Automation Line A

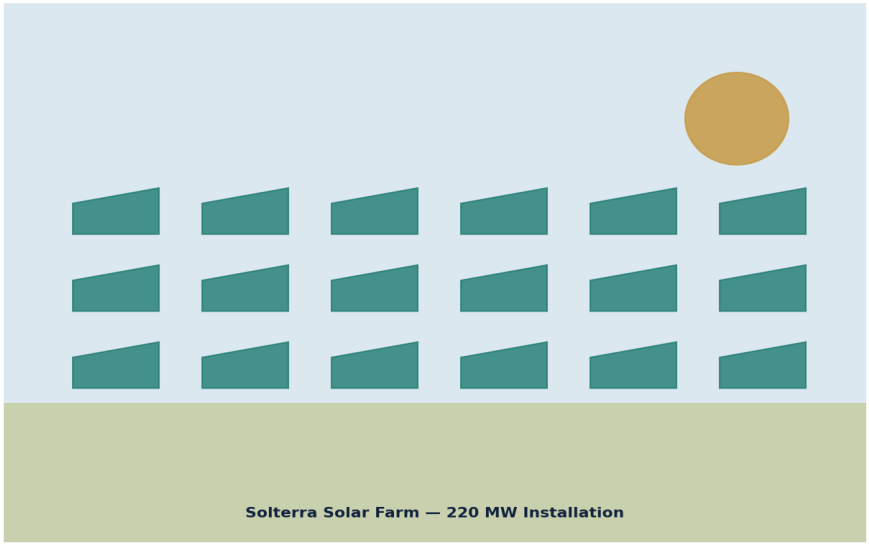

Industrial Automation segment operations.

Renewable Energy Systems

Ardenmoor's fastest-growing segment carries structurally lower margins than the automation business today, reflecting continued investment in scaling new manufacturing capacity, though management expects margins to converge with the broader portfolio over time.

Renewable Energy Systems — FY2025 Segment Financial Detail ($ in millions)

Metric	FY2025
Segment Revenue	4,269.3
Segment Operating Profit	798.4
Segment Operating Margin	18.7%
Segment Capital Expenditure	290.8
Segment Headcount	11,227

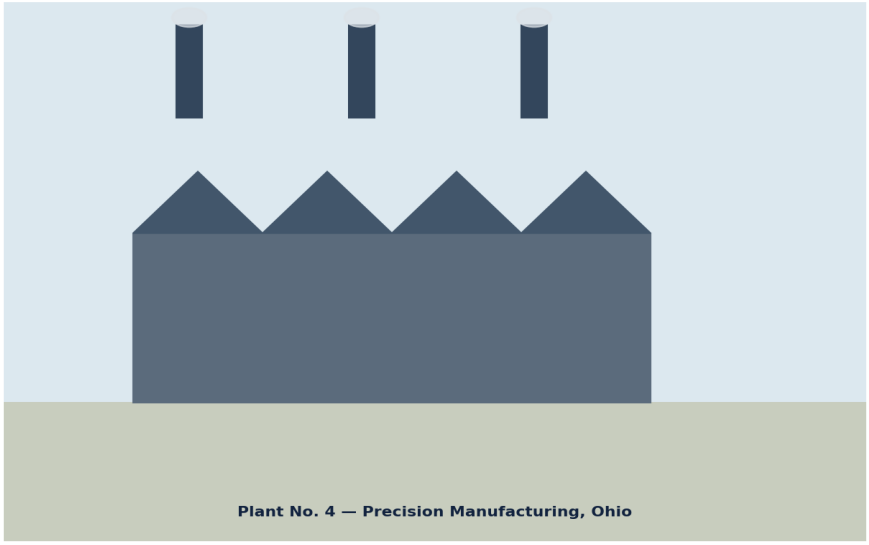

Renewable Energy Systems segment operations.

Precision Manufacturing

Precision Manufacturing benefits from long-term aerospace and defense supply agreements that support premium pricing and the segment's highest operating margin.

Precision Manufacturing — FY2025 Segment Financial Detail ($ in millions)

Metric	FY2025
Segment Revenue	3,675.2
Segment Operating Profit	889.4
Segment Operating Margin	24.2%
Segment Capital Expenditure	199.9
Segment Headcount	14,502

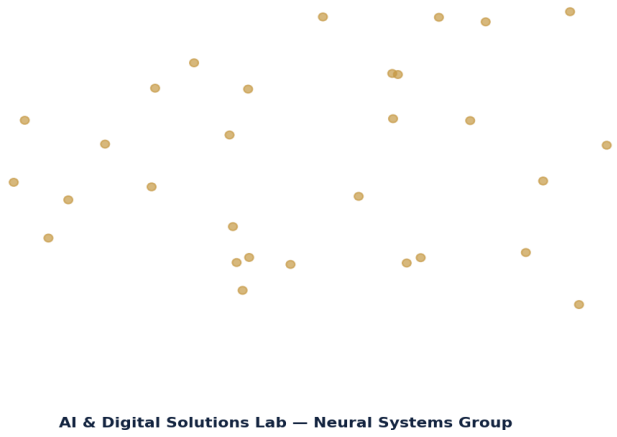

Precision Manufacturing segment operations.

Digital & AI Solutions

As a software-weighted segment, Digital & AI Solutions carries the portfolio's highest operating margin despite its smaller absolute revenue base.

Digital & AI Solutions — FY2025 Segment Financial Detail ($ in millions)

Metric	FY2025
Segment Revenue	2,855.0
Segment Operating Profit	859.4
Segment Operating Margin	30.1%
Segment Capital Expenditure	72.7
Segment Headcount	5,146

Digital & AI Solutions segment operations.

28 Appendix B: Complete Manufacturing Plant Directory

The table below lists all 21 Ardenmoor manufacturing plants, providing location, segment assignment, and headcount detail beyond the representative sample presented in the Manufacturing Facilities section of this report.

Complete Manufacturing Plant Directory (21 Facilities)

Plant	Location	Segment	Employees
Plant 1	Chicago, Illinois, USA	Industrial Automation	2,140
Plant 2	Detroit, Michigan, USA	Industrial Automation	1,680
Plant 3	Charlotte, North Carolina, USA	Precision Manufacturing	1,420
Plant 4	Cleveland, Ohio, USA	Precision Manufacturing	1,860
Plant 5	Phoenix, Arizona, USA	Digital & AI Solutions	540
Plant 6	Toronto, Canada	Industrial Automation	980
Plant 7	Monterrey, Mexico	Precision Manufacturing	1,310
Plant 8	Guadalajara, Mexico	Renewable Energy Systems	890
Plant 9	Austin, Texas, USA	Renewable Energy Systems	1,520
Plant 10	Sao Paulo, Brazil	Industrial Automation	760
Plant 11	Rotterdam, Netherlands	Precision Manufacturing	980
Plant 12	Lyon, France	Industrial Automation	870
Plant 13	Turin, Italy	Precision Manufacturing	690
Plant 14	Bavaria, Germany	Industrial Automation	1,340
Plant 15	Katowice, Poland	Renewable Energy Systems	610
Plant 16	Gothenburg, Sweden	Renewable Energy Systems	540
Plant 17	Johannesburg, South Africa	Industrial Automation	480
Plant 18	Pune, India	Precision Manufacturing	1,120
Plant 19	Shenzhen, China	Digital & AI Solutions	430
Plant 20	Yokohama, Japan	Precision Manufacturing	610
Plant 21	Singapore	Digital & AI Solutions	610

29 Appendix C: Global Workforce by Country

Ardenmoor's workforce is distributed across 34 countries. The table below presents employee counts for the twenty largest countries of operation by headcount, together with an aggregate figure for the remaining fourteen countries.

Global Workforce by Country, FY2025 (Representative Countries)

Country	Employees
United States	11,840
Germany	4,120
Mexico	3,480
China	2,860
India	2,640
Netherlands	2,210
Brazil	1,980
Canada	1,740
Poland	1,520
Japan	1,380
Singapore	1,240
South Africa	1,120
France	1,060
Sweden	940
Italy	890
United Kingdom	820
South Korea	760
Australia	690
Spain	640
Other (14 countries)	6,070

30 Appendix D: Representative Product Catalog

The following table lists a representative sample of Ardenmoor's product portfolio across all four business segments. This catalog is illustrative and does not represent the company's complete product range.

Representative Product Catalog

Product	Segment	Description
ArdenCore 7	Industrial Automation	Programmable control module for robotic assembly cells
ArdenCore 7X	Industrial Automation	Ruggedized control module for harsh-environment deployments
PX-200	Precision Manufacturing	Precision sensor array for dimensional quality inspection
PX-210	Precision Manufacturing	High-speed vision-based inspection sensor
RenewLine S1	Renewable Energy Systems	Monocrystalline solar module, 420W
RenewLine S2	Renewable Energy Systems	Bifacial solar module, 460W
RenewLine G1	Renewable Energy Systems	Grid-scale battery storage enclosure
MotionArm A6	Industrial Automation	6-axis robotic arm for general assembly
MotionArm D2	Industrial Automation	Dual-gripper robotic cell for high-mix assembly
NavBot AGV-100	Industrial Automation	Autonomous guided vehicle for plant floor logistics
Ardenmoor Digital Twin Platform	Digital & AI Solutions	Software platform for real-time factory simulation
PredictIQ	Digital & AI Solutions	Predictive maintenance analytics software
VisionQC	Digital & AI Solutions	Computer-vision-based automated quality control software
SupplyOpt	Digital & AI Solutions	AI-driven supply chain optimization software
PrecisionMill X4	Precision Manufacturing	CNC precision milling system
PrecisionTurn T2	Precision Manufacturing	CNC precision turning system
ArdenGrid Inverter	Renewable Energy Systems	Utility-scale solar inverter
ArdenGrid Controller	Renewable Energy Systems	Grid integration and load balancing controller
SafetyGuard Sensor Suite	Industrial Automation	Machine safety sensor and interlock system
ArdenCloud Connect	Digital & AI Solutions	Cloud connectivity gateway for legacy industrial equipment

31 Appendix E: Report of Independent Auditors (Illustrative)

The following is an illustrative auditor's report format included solely to demonstrate the structure of a complete annual report. It does not represent an actual audit opinion.

Opinion

In our illustrative opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of Ardenmoor Industries Corporation as of the end of fiscal year 2025, and the results of its operations and its cash flows for the year then ended, in conformity with the illustrative basis of accounting described in the notes to these financial statements.

Basis for Opinion

This illustrative report is prepared for demonstration purposes only. In an actual annual report, this section would describe the auditor's responsibilities, the standards applied during the audit, and the basis for the auditor's independence from the company.

Key Audit Matters

In an actual audit report, this section would describe the matters that, in the auditor's professional judgment, were of most significance in the audit of the current period's financial statements, such as revenue recognition, goodwill impairment testing, or inventory valuation.

32 Appendix F: Investor & Shareholder Information

Stock Listing

Ardenmoor Industries Corporation common stock trades on the New York Stock Exchange under the ticker symbol ARDX.

Annual General Meeting

The Annual General Meeting of Shareholders is typically held in the second quarter of each fiscal year at the company's Chicago headquarters, with a virtual participation option available to all shareholders of record.

Transfer Agent

Shareholder record-keeping and dividend distribution services are administered by the company's transfer agent, details of which are available through the Investor Relations section of the company's corporate website.

Fiscal Calendar

Ardenmoor's fiscal year ends on December 31. Quarterly earnings are typically released within four to six weeks following the close of each fiscal quarter.

Forward-Looking Statement Reminder

As noted elsewhere in this report, Ardenmoor Industries Corporation is a wholly fictional company created for software testing and demonstration purposes. This Annual Report, including all financial figures, executives, directors, products, and subsidiaries described herein, is entirely fictitious.

33 Appendix G: Corporate Timeline

The timeline below highlights key milestones in Ardenmoor's history, from its founding as a single precision tooling workshop through its evolution into a diversified global technology enterprise.

Key milestones in Ardenmoor's corporate history, 1978–2021.

Ardenmoor recognized for manufacturing excellence at the FY2025 Industry Awards

Ardenmoor was recognized for manufacturing excellence at the FY2025 Industry Awards.

Certifications & Standards

Ardenmoor's manufacturing plants maintain a range of internationally recognized quality, environmental, safety, and information security certifications, reflecting the company's commitment to consistent standards across its global footprint.

Facility Certifications & Standards

Standard	Scope
ISO 9001:2015	Quality Management Systems — all manufacturing plants
ISO 14001:2015	Environmental Management Systems — 18 of 21 plants
ISO 45001:2018	Occupational Health & Safety Management — all manufacturing plants
ISO/IEC 27001:2022	Information Security Management — enterprise data centers
IATF 16949:2016	Automotive Quality Management — automotive-serving plants

Ardenmoor manufacturing facilities maintain internationally recognized certifications

Ardenmoor manufacturing facilities maintain a range of internationally recognized certifications.

ESG Performance by Plant

The table below presents plant-level ESG performance indicators, supplementing the segment- and company-wide ESG metrics presented in the Sustainability (ESG) section of this report. Performance varies across plants depending on local energy grid composition, plant age, and the nature of manufacturing processes performed at each site.

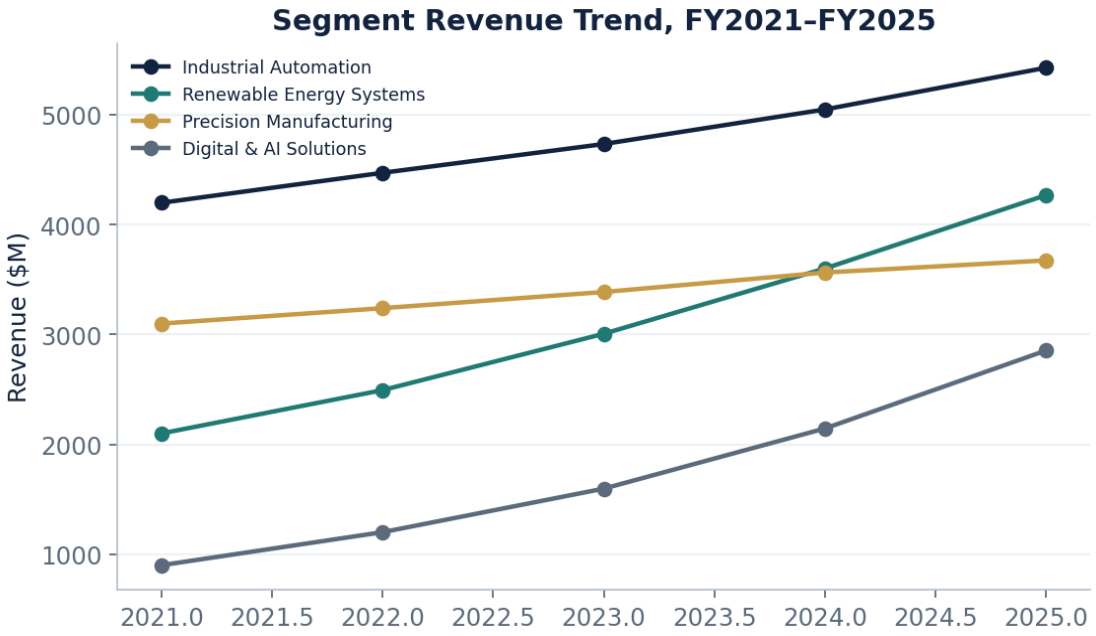

ESG Performance by Plant, FY2025

Plant	Scope 1+2 Emissions (kt CO2e)	Renewable Energy Use	Recordable Incident Rate
Plant 1 (Chicago)	19.7	65%	1.01
Plant 2 (Detroit)	21.2	71%	1.66
Plant 3 (Charlotte)	26.3	19%	1.83
Plant 4 (Cleveland)	23.1	33%	1.5
Plant 5 (Phoenix)	25.8	25%	1.03
Plant 6 (Toronto)	25.1	42%	1.32
Plant 7 (Monterrey)	18.6	18%	1.64
Plant 8 (Guadalajara)	15.0	29%	1.96
Plant 9 (Austin)	22.8	28%	1.7
Plant 10 (Sao Paulo)	7.6	57%	1.45
Plant 11 (Rotterdam)	8.8	18%	2.05
Plant 12 (Lyon)	6.1	67%	0.77
Plant 13 (Turin)	27.6	28%	0.89
Plant 14 (Bavaria)	27.2	52%	1.89

Plant	Scope 1+2 Emissions (kt CO2e)	Renewable Energy Use	Recordable Incident Rate
Plant 15 (Katowice)	19.8	29%	2.0
Plant 16 (Gothenburg)	21.2	42%	0.91
Plant 17 (Johannesburg)	13.9	28%	1.99
Plant 18 (Pune)	11.8	39%	0.91
Plant 19 (Shenzhen)	19.3	18%	1.41
Plant 20 (Yokohama)	21.6	22%	0.93
Plant 21 (Singapore)	24.0	48%	1.58

34 Appendix H: Five-Year Segment Financial Trends

This appendix presents five-year revenue, margin, and operating profit trends for each of Ardenmoor's four business segments, supplementing the FY2025 segment detail presented in Appendix A.

Segment revenue trends, FY2021 through FY2025.

Industrial Automation

Industrial Automation — Five-Year Financial Trend ($ in millions)

Metric	2021	2022	2023	2024	2025
Segment Revenue	4,200.0	4,472.9	4,735.0	5,049.8	5,429.7
Segment Operating Margin	19.8%	20.3%	20.7%	21.1%	21.5%
Segment Operating Profit	831.6	908.0	980.1	1,065.5	1,167.4

Renewable Energy Systems

Renewable Energy Systems — Five-Year Financial Trend ($ in millions)

Metric	2021	2022	2023	2024	2025
Segment Revenue	2,100.0	2,494.1	3,007.3	3,601.8	4,269.3
Segment Operating Margin	14.2%	15.6%	16.8%	17.6%	18.7%
Segment Operating Profit	298.2	389.1	505.2	633.9	798.4

Precision Manufacturing

Precision Manufacturing — Five-Year Financial Trend ($ in millions)

Metric	2021	2022	2023	2024	2025
Segment Revenue	3,100.0	3,240.6	3,387.6	3,565.1	3,675.2
Segment Operating Margin	22.1%	22.8%	23.3%	23.8%	24.2%
Segment Operating Profit	685.1	738.9	789.3	848.5	889.4

Digital & AI Solutions

Digital & AI Solutions — Five-Year Financial Trend ($ in millions)

Metric	2021	2022	2023	2024	2025
Segment Revenue	900.0	1,200.9	1,597.1	2,145.1	2,855.0
Segment Operating Margin	24.5%	26.2%	27.8%	29.1%	30.1%
Segment Operating Profit	220.5	314.6	444.0	624.2	859.4

35 Appendix I: Regional Financial Detail

The table below presents FY2025 revenue, estimated operating margin, and manufacturing plant count by region, providing additional granularity beyond the geographic revenue breakdown presented in the Market Overview section.

Regional Financial Detail, FY2025

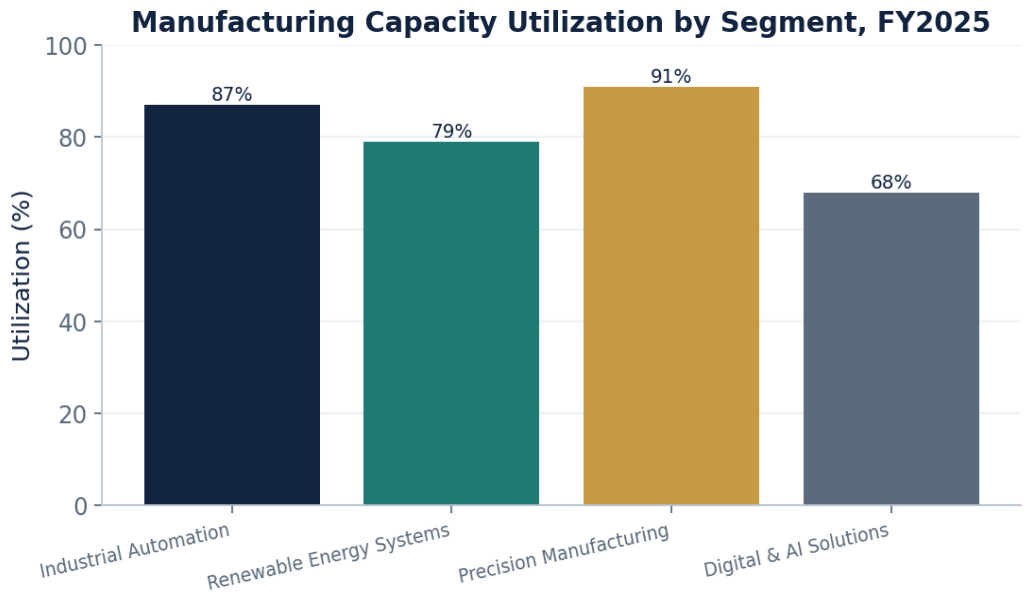

Region	Revenue ($M)	Operating Margin	Manufacturing Plants
North America	6,167.1	21.2%	8
Europe	4,381.9	19.8%	6
Asia-Pacific	3,895.0	17.6%	4
Latin America	1,136.0	16.5%	2
Middle East & Africa	649.2	15.2%	1

Manufacturing Capacity Utilization

Capacity utilization varies by segment, reflecting differences in the maturity of each segment's manufacturing footprint. Precision Manufacturing operates at the highest utilization, while Digital & AI Solutions, which relies less on physical manufacturing capacity, is measured against a smaller and more recently established production and testing footprint.

Manufacturing Capacity Utilization by Segment, FY2025

Segment	Capacity Utilization
Industrial Automation	87%
Renewable Energy Systems	79%
Precision Manufacturing	91%
Digital & AI Solutions	68%

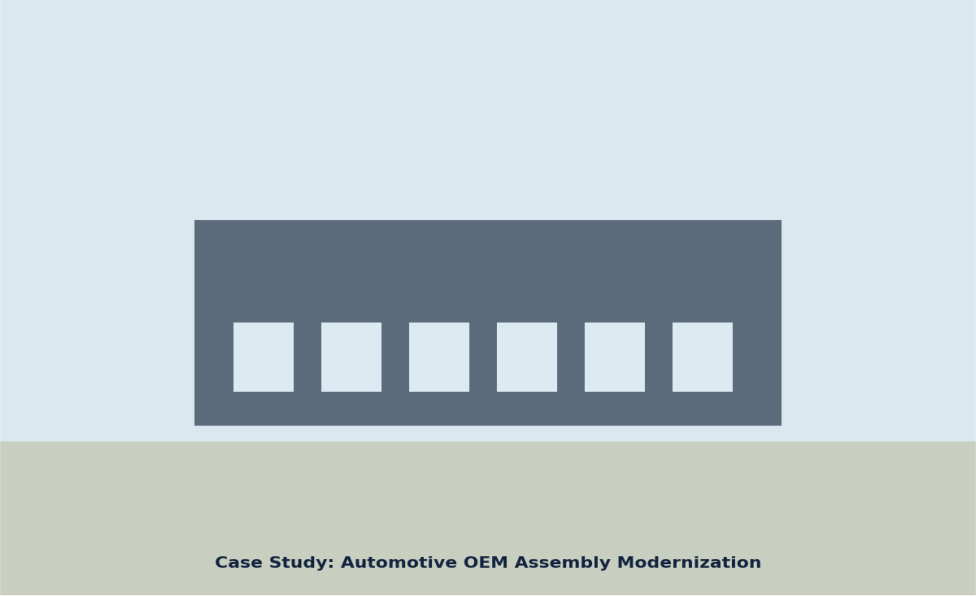

Manufacturing capacity utilization by segment, FY2025.

36 Appendix J: Customer Case Studies

The following illustrative case studies describe representative customer engagements across Ardenmoor's business segments. Customer names have been generalized to protect confidentiality.

Case Study: Automotive OEM Assembly Modernization

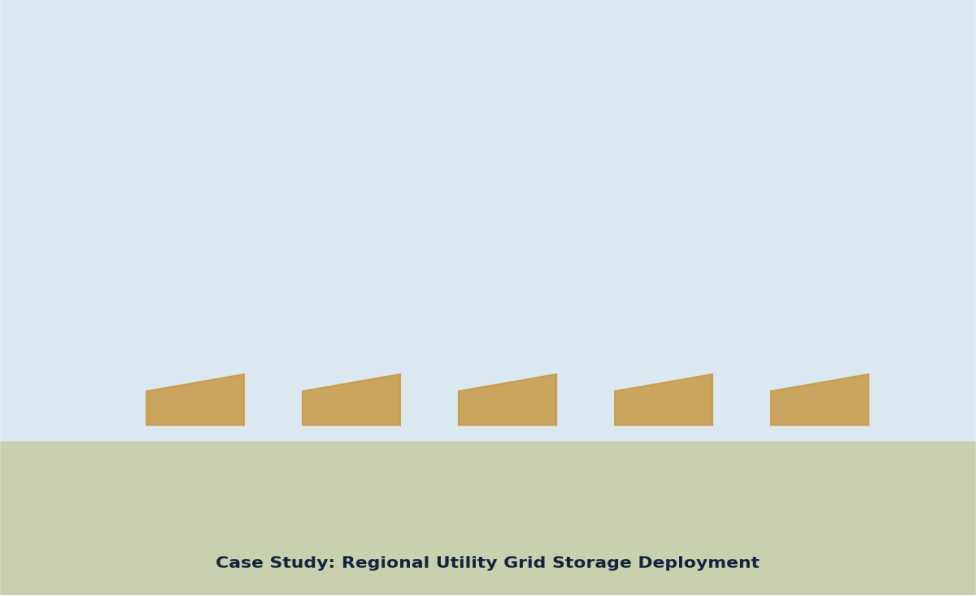

A leading automotive original equipment manufacturer engaged Ardenmoor to modernize a legacy body-in-white assembly line across three plants. Ardenmoor's Industrial Automation segment deployed dual-gripper robotic cells and AGV-based material handling, integrated with the customer's existing manufacturing execution system. The customer reported a meaningful reduction in unplanned downtime and improved first-pass yield within the first year of deployment.

Automotive OEM assembly line modernized with Ardenmoor automation systems.

Case Study: Regional Utility Grid Storage Deployment

A regional electric utility partnered with Ardenmoor's Renewable Energy Systems segment to deploy grid-scale battery storage alongside a new solar generation facility, supporting the utility's renewable integration targets. Ardenmoor provided both hardware components and the ArdenGrid controller software used to manage load balancing across the combined solar-plus-storage system.

Grid-scale storage deployment supported by Ardenmoor's Renewable Energy Systems segment.

Case Study: Aerospace Supply Chain Precision Components

An aerospace tier-1 supplier selected Ardenmoor's Precision Manufacturing segment as a qualified source for critical machined components under a multi-year supply agreement, following an extensive qualification process covering material traceability, dimensional tolerances, and statistical process control documentation.

Case Study: Predictive Maintenance Software Rollout

A multi-site industrial manufacturer adopted Ardenmoor's PredictIQ predictive maintenance platform across twelve production lines, integrating with existing automation hardware from multiple vendors. The customer's maintenance team reported earlier detection of bearing and motor wear patterns, reducing unplanned line stoppages.

37 Appendix K: Non-GAAP Financial Measure Reconciliations

Ardenmoor uses certain non-GAAP financial measures, including EBITDA and Free Cash Flow, to supplement results reported in accordance with the illustrative accounting basis used in this report. Management believes these measures provide additional insight into the company's operating performance and cash generation. The tables below reconcile each non-GAAP measure to its most directly comparable measure.

Reconciliation of Net Profit to EBITDA (Non-GAAP) ($ in millions)

Line Item	2021	2022	2023	2024	2025
Net Profit	1,017.3	1,220.3	1,438.2	1,756.0	2,122.2
Add: Income Tax Expense	317.7	381.1	449.2	548.4	662.9
Add: Interest Expense	210.0	224.0	238.0	252.0	266.0
Add: Depreciation & Amortization	422.3	467.7	521.8	588.8	665.4
EBITDA (Non-GAAP)	1,967.3	2,293.1	2,647.2	3,145.2	3,716.5

Reconciliation of Cash Flow from Operations to Free Cash Flow (Non-GAAP) ($ in millions)

Line Item	2021	2022	2023	2024	2025
Cash Flow from Operations	1,534.5	1,788.6	2,064.8	2,453.3	2,898.9
Less: Capital Expenditure	(535.6)	(604.7)	(687.3)	(789.9)	(908.8)
Free Cash Flow (Non-GAAP)	998.9	1,183.9	1,377.5	1,663.4	1,990.1

38 Appendix L: Environmental Data Detail

This appendix presents five-year environmental performance trends, supplementing the FY2025 ESG metrics presented in the Sustainability section of this report.

Environmental Performance, Five-Year Trend

Metric	2021	2022	2023	2024	2025
Total Water Withdrawal (megaliters)	3,420	3,280	3,190	3,110	3,200
Water Recycled (%)	31%	36%	41%	47%	54%
Total Waste Generated (kt)	84	79	73	68	62
Waste Diverted from Landfill (%)	58%	63%	68%	74%	79%
Renewable Electricity Use (%)	22%	28%	35%	44%	53%

Community Investment

In addition to its environmental programs, Ardenmoor invests directly in the communities where it operates through the Ardenmoor Cares Foundation and related workplace giving programs.

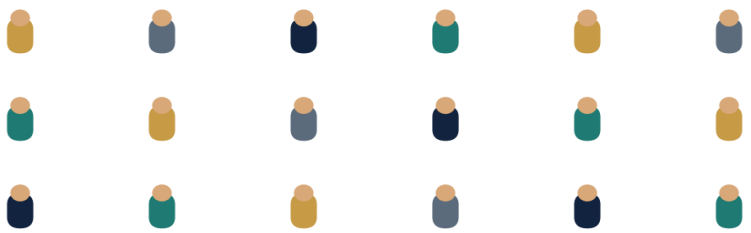

Community Investment, FY2025 ($ in thousands)

Program	Investment
STEM Education Outreach	1,840
Ardenmoor Cares Foundation Grants	2,610
Reforestation & Environmental Initiatives	980
Employee Volunteer Program (in-kind)	640
Community Health & Wellness Initiatives	510

39 Appendix M: A Message to Our Employees

None of the results described in this report would be possible without the dedication of Ardenmoor's global workforce. From the engineers designing our next-generation control systems to the technicians assembling products on the plant floor, every employee contributes directly to the company's performance and its ability to serve customers reliably around the world.

As Ardenmoor continues to grow and diversify, the company remains committed to investing in the training, safety, and career development of its people, recognizing that sustained business success depends on a skilled, engaged, and safe workforce.

Global Employee Town Hall — FY2025

Employees from across the global workforce participate in the FY2025 Global Employee Town Hall.

40 Appendix N: Frequently Asked Questions

What stock exchange does Ardenmoor trade on?

Ardenmoor Industries Corporation trades on the New York Stock Exchange under the ticker symbol ARDX.

What is Ardenmoor's fiscal year end?

Ardenmoor's fiscal year ends on December 31.

How many employees does Ardenmoor have?

Ardenmoor employed approximately 46,782 people as of the end of fiscal year 2025.

What is Ardenmoor's dividend policy?

The Board targets a payout ratio of approximately 30 to 35 percent of net profit, reviewed annually.

How many manufacturing plants does Ardenmoor operate?

Ardenmoor operates 21 manufacturing plants across 34 countries.

What are Ardenmoor's reportable business segments?

Industrial Automation, Renewable Energy Systems, Precision Manufacturing, and Digital & AI Solutions.

What is Ardenmoor's carbon neutrality target?

Ardenmoor has committed to achieving carbon neutrality across its Scope 1 and Scope 2 emissions by 2040.

Where is Ardenmoor headquartered?

Ardenmoor's global headquarters is located in Chicago, Illinois, United States.

41 Appendix O: List of Tables

The following is a complete list of the data tables presented throughout this report, for reference.

List of Tables

Table	Title

Selected Awards & Recognition

Ardenmoor received a number of external recognitions during fiscal year 2025, reflecting the company's performance across manufacturing, sustainability, safety, and innovation. These recognitions are illustrative and presented for demonstration purposes.

Selected Awards & Recognition, FY2025 (Illustrative)

Recognition	Awarding Body (Illustrative)
Manufacturing Excellence Award	Regional Industrial Manufacturers Council
Top Employer for Engineering Talent	National Engineering Workforce Alliance
Sustainability Leadership Recognition	Industrial Sustainability Forum
Workplace Safety Excellence Award	Occupational Safety Standards Board
Innovation in Industrial AI Award	Advanced Manufacturing Technology Council

44 Appendix R: Corporate Contact Information

Corporate Headquarters

Chicago, Illinois, United States

Investor Relations

Inquiries regarding this report or Ardenmoor's financial performance may be directed to the company's Investor Relations department through the contact channels published on the company's corporate website.

Media Relations

Media inquiries may be directed to the company's Corporate Communications department.

45 Appendix S: Governance Policies Overview

Ardenmoor maintains a set of enterprise-wide policies that govern employee and supplier conduct across the organization. The following section summarizes the principal policies referenced throughout this report.

Code of Business Conduct

All Ardenmoor employees, officers, and directors are required to complete annual training on the company's Code of Business Conduct, which addresses conflicts of interest, fair dealing, protection of confidential information, and compliance with applicable laws across all jurisdictions in which the company operates.

Whistleblower Policy

Ardenmoor maintains a confidential reporting channel, administered by an independent third party, through which employees and other stakeholders may report suspected violations of the Code of Business Conduct or applicable law without fear of retaliation. Reports are reviewed by the Audit Committee on a quarterly basis.

Anti-Corruption Policy

The company prohibits bribery and corruption in all forms and requires enhanced due diligence for third-party intermediaries operating in jurisdictions identified as higher risk under the company's risk-based compliance program.

Human Rights Policy

Ardenmoor is committed to respecting internationally recognized human rights across its own operations and its supply chain, including prohibitions on forced labor and child labor. The company's supplier code of conduct requires qualified suppliers to affirm compliance with these standards as a condition of doing business with Ardenmoor.

Supply Chain Responsibility

Beyond contractual commitments, Ardenmoor conducts periodic on-site audits of a risk-weighted sample of its supplier base, focusing on labor practices, workplace safety, and environmental compliance. Suppliers identified with material findings are placed on a corrective action plan with defined remediation timelines, subject to ongoing monitoring by Ardenmoor's supply chain responsibility team.

Data Privacy

Ardenmoor maintains a global data privacy program addressing the collection, use, and protection of employee, customer, and business partner data, aligned with applicable data protection regulations across the company's operating jurisdictions.

46 Appendix T: Closing Remarks

Ardenmoor's fiscal year 2025 results reflect the cumulative benefit of a multi-year strategy focused on operational discipline, geographic diversification, and investment in the technologies that will define the next generation of industrial manufacturing. The Board and Executive Leadership Team extend their appreciation to shareholders, customers, suppliers, and employees for their continued partnership and support.

End of Report

This concludes the Ardenmoor Industries Corporation Annual Report for fiscal year 2025. This document, including all financial figures, executives, directors, products, subsidiaries, and other details described herein, is entirely fictitious and was created solely for software testing and demonstration purposes.
